## Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1

DRAG DROP - (Topic 4)

You are developing an app that warehouse workers will run on their phones to perform inventory counts. You need to design the app.

Which type of control should you use? To answer, drag the appropriate control types to the correct requirements. Each control type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection presents a complete solution.

Control types

Text box

Combo box

Slider

Radio

Answer Area

Requirement	Control type
Capture decimal numbers.	
Select multiple products from a list.	
Set the status of a product.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Control types

Text box

Combo box

Slider

Radio

Answer Area

Requirement	Control type
Capture decimal numbers.	Text box
Select multiple products from a list.	Combo box
Set the status of a product.	Radio

NEW QUESTION 2

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Microsoft Teams and Microsoft 365. Employees use Microsoft Excel to create checklist and capture measurements.

The company requites a Microsoft Power Platform app to consolidate the checklists and perform the measurements- Network connectivity may not be available when measurements are taken.

Which features should you use? To answer, select the appropriate options in the answer area

NOTE: Each coned selection is worth one point.

Answer Area

Requirement	Feature
App type	<div><div>Model-driven app</div><div>Canvas app</div><div>Model-driven app</div></div>
Data source	<div><div>Cloud Excel table</div><div>Local Excel table</div><div>Cloud Excel table</div></div>
Offline mode	<div><div>Power Apps mobile</div><div>Field Service Mobile</div><div>Power Apps mobile</div><div>Power Apps for Windows</div><div>Power Apps wrap</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Feature
App type	<div>Model-driven app</div> <div>Canvas app</div> <div>Model-driven app</div>
Data source	<div>Cloud Excel table</div> <div>Local Excel table</div> <div>Cloud Excel table</div>
Offline mode	<div>Power Apps mobile</div> <div>Field Service Mobile</div> <div>Power Apps mobile</div> <div>Power Apps for Windows</div> <div>Power Apps wrap</div>

NEW QUESTION 3

- (Topic 4)

You design a canvas app for users to search thousands of records. You select a data source that supports delegation to optimize performance. You need to create the app so that it takes advantage of the delegable functionality of the data source. What should you do?

- A. Run multiple processes simultaneously.
- B. Use the query functions the data source provides.
- C. Use the data returned from the data source in multiple languages.
- D. Connect to the same data source as different users at run time.

Answer: B

NEW QUESTION 4

DRAG DROP - (Topic 4)

You have a basic user security role in a test environment. You create a canvas app without customization in the environment. You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add the app to the solution.	
Export the solution.	
Send the solution to production administrators.	
Select the canvas app in the Maker portal.	
Export the package.	
Send the package to production administrators.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Add the app to the solution.	Select the canvas app in the Maker portal.
Export the solution.	
Send the solution to production administrators.	Export the package.
Select the canvas app in the Maker portal.	
Export the package.	Send the package to production administrators.
Send the package to production administrators.	

NEW QUESTION 5

DRAG DROP - (Topic 4)

DRAG DROP

You are designing a new model-driven app for salespeople at a company. The company requires that all new line-of-business apps must use as much native functionality as possible to avoid having developers maintain code. You need to determine how to implement the app's business logic. Which method should you use? To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may NOTE: Each correct selection is worth one point.

Methods		Requirement	Method
Business rules	• • • •	Validate the postal code format based on the state or province entered by a user.	
Power Automate flows		Ensure that the app can communicate with other business applications by using existing connectors.	
Business process flows			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Methods		Requirement	Method
Business rules	• • • •	Validate the postal code format based on the state or province entered by a user.	Business rules
Power Automate flows		Ensure that the app can communicate with other business applications by using existing connectors.	Power Automate flows
Business process flows			

NEW QUESTION 6

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products.

The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.

Only two new tables should be created in Microsoft Dataverse:

? Products: Holds the products that can be requested.

? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.

You need to identify the data types to use when building the table columns in Dataverse.

Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data types	Answer Area								
Lookup	<table><thead><tr><th>Scenario</th><th>Data types</th></tr></thead><tbody><tr><td>Create a column in the Products table that displays the category of the product</td><td>Data type</td></tr><tr><td>Create a column in the Products table for the product ID of the product</td><td>Data type</td></tr><tr><td>Create a column in the Requests table that allows the user to select form a list of available products</td><td>Data type</td></tr></tbody></table>	Scenario	Data types	Create a column in the Products table that displays the category of the product	Data type	Create a column in the Products table for the product ID of the product	Data type	Create a column in the Requests table that allows the user to select form a list of available products	Data type
Scenario	Data types								
Create a column in the Products table that displays the category of the product	Data type								
Create a column in the Products table for the product ID of the product	Data type								
Create a column in the Requests table that allows the user to select form a list of available products	Data type								
Choice									
Text									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text

Text columns can contain text characters. This column type has several format options that will change the presentation of the text.

Box 2: Lookup

When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.

Box 3: Choice

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

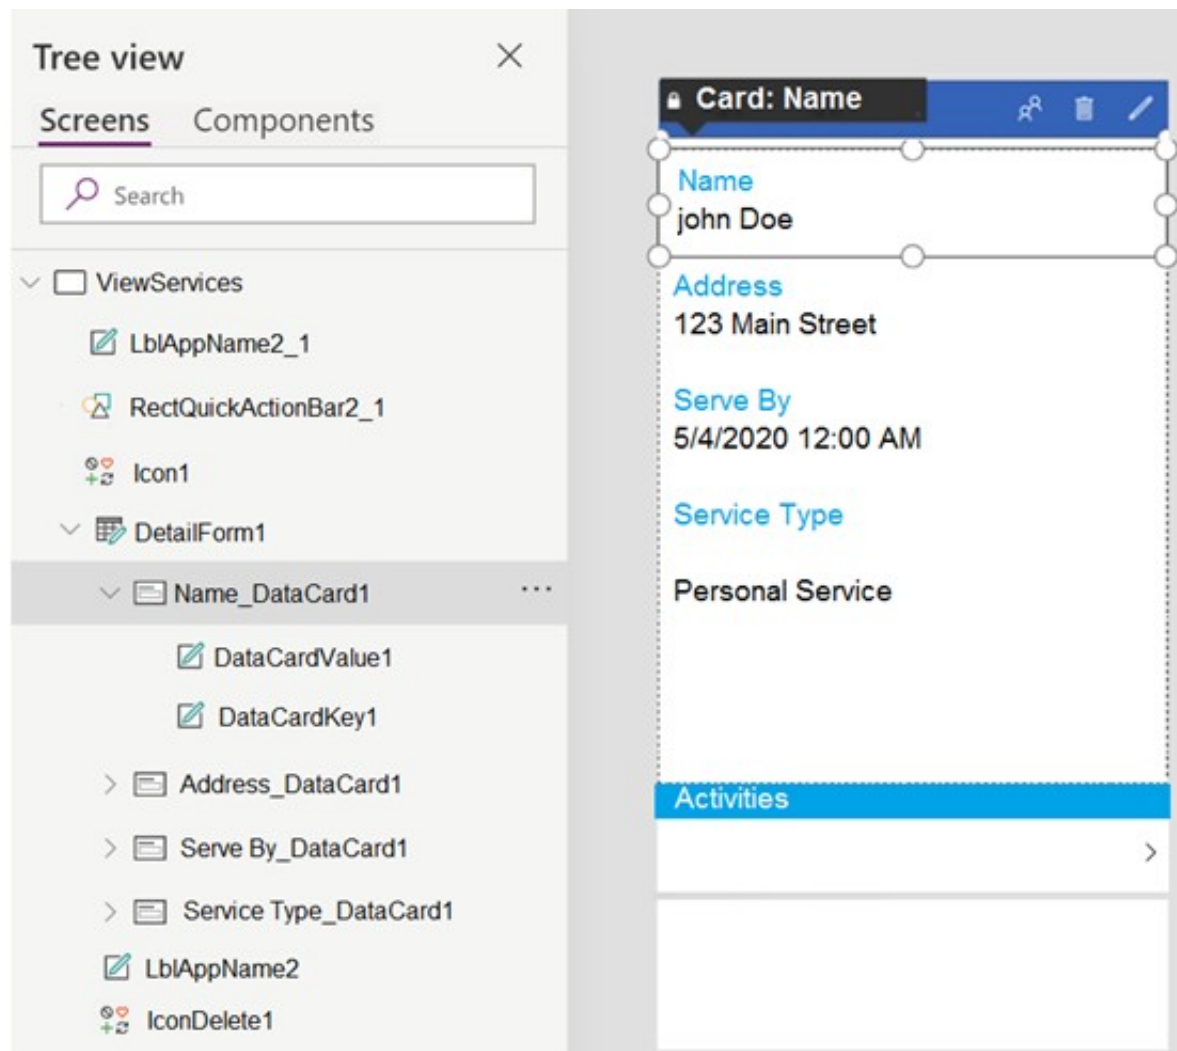

NEW QUESTION 7

HOTSPOT - (Topic 4)

You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼

Name\_DataCard1.Default

Name\_DataCardKey1.Default

Name\_DataCardValue1.Default

Which action should you perform on the People icon?

▼

In the On Select property, set the Activity form to Edit mode.

In the On Select property, set the Activity form to View mode.

Move the icon to the Activity form and set the On Select property to the Activity screen.

Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Name\_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

**NEW QUESTION 8**

- (Topic 4)

You are an app designer for a hotel.

The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.

Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

**Answer: A**

**Explanation:**

Manage environment in the Power Platform admin center. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

**NEW QUESTION 9**

- (Topic 4)

You create a canvas app within a Power Platform environment.  
You need to identify potential accessibility issues for the canvas app before making the app available to other users.  
Which tool should you use?

- A. Portal Checker
- B. App Checker
- C. Solution Checker

**Answer:** B

**Explanation:**

Find accessibility issues  
\* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

\* 2. In the menu that appears, select Accessibility.  
A list of issues appears, sorted first by severity and then by screen.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

**NEW QUESTION 10**

DRAG DROP - (Topic 4)  
You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.  
You need to configure the elements of the data source.  
Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Data elements

Table

View

View

**NEW QUESTION 10**

DRAG DROP - (Topic 4)  
You create an app with multiple screens.  
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.  
You need to create a reusable gallery that displays information based on the current record.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.  
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Add a gallery control.

Add an input property.

Create a component.

Add a screen.

Create a form.

Add an output property.

Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- Create a component
- Add an input property
- Add a gallery control

From <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component> step 10 and 11

**NEW QUESTION 14**

- (Topic 4)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

**Answer:** D

**Explanation:**

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

**NEW QUESTION 18**

DRAG DROP - (Topic 4)

You have a solution that contains a Power Automate flow, an environment variable, and a

Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Select the managed solution.

Adjust the version number.

Publish all changes.

Select the unmanaged solution.

**Answer Area**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Adjust the version number. Step 2: Select the managed solution.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Step 3: Publish all changes.

**NEW QUESTION 21**

- (Topic 4)

You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team.

Where must you configure this restriction?

- A. Dashboard
- B. Report
- C. Dataset
- D. Settings

**Answer:** C

**Explanation:**

Restrict access to the dataset.

Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.

Reference:

<https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but-useful>

**NEW QUESTION 24**

HOTSPOT - (Topic 4)

You need to create a model-driven app without using code.  
Which tools should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Tool
Select the forms and views that the app will use.	<div><div></div><div>Site Map designer</div><div>Solution Explorer</div><div>App designer</div><div>Entity view</div></div>
Design the navigation for the app.	<div><div></div><div>Site Map designer</div><div>Dynamics 365 Admin center</div><div>Microsoft Azure DevOps</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: App designer  
As an app maker, you can create and edit public views by using Power Apps.  
Box 2: Site Map designer  
Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

NEW QUESTION 28

- (Topic 4)  
You create an app with multiple screens.  
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.  
You need to create a reusable gallery that displays information based on the current record.  
Which three actions should you perform?  
NOTE: Each correct selection is worth one point.

- A. Add a gallery control
- B. Add an input property
- C. Create a component
- D. Create a form
- E. Add a screen
- F. Add an output property

Answer: ABC

**Explanation:**  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 29

HOTSPOT - (Topic 4)  
HOTSPOT  
A company uses Power Apps. The company has a model-driven app that accesses a Microsoft Dataverse table. The app is shared with all users who all have the Basic User security role.  
You must prevent the users from running and sharing the app.  
What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Prevent users from running the app.	<div><div>Turn off the app.</div><div>Export the app.</div><div>Turn off the app.</div><div>Remove access to the table.</div></div>
Prevent users from sharing the app.	<div><div>Remove access to the table.</div><div>Export the app.</div><div>Turn off the app.</div><div>Remove access to the table.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Answer Area

Requirement	Action
Prevent users from running the app.	Turn off the app.
	Export the app.
	Turn off the app.
Prevent users from sharing the app.	Remove access to the table.
	Export the app.
	Turn off the app.

NEW QUESTION 34

DRAG DROP - (Topic 4)  
DRAG DROP

A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file. You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select manual data.

Log into the Power BI service.

Install Power BI Desktop and log in.

Select Create.

Select Use first row as headers.

Paste the data.

Answer Area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Select manual data.

Log into the Power BI service.

Install Power BI Desktop and log in.

Select Create.

Select Use first row as headers.

Paste the data.

Answer Area

Log into the Power BI service.

Install Power BI Desktop and log in.

Select Create.

Select Use first row as headers.

Paste the data.

NEW QUESTION 38

- (Topic 4)

You create a canvas app. A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to a value greater than zero. Which section of the App checker results should you check?

- A. Rules
- B. Performance
- C. Accessibility
- D. Runtime

Answer: C

Explanation:

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity. Issues include:  
? Focus isn't showing  
When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 41

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties. You need to create a solution for the apps. Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Component library  
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.  
By creating a component library, app makers easily share and update one or more components with other makers.  
Component libraries are containers of component definitions that make it easy to: Discover and search components.  
Publish updates.  
Notify app makers of available component updates.  
Box 2: Component  
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 42

- (Topic 4)  
A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?
- A. Lookup  
B. Choice  
C. Choices  
D. Text

Answer: A

NEW QUESTION 44

- DRAG DROP - (Topic 4)  
DRAG DROP  
A company uses data from a publicly available web service. You plan to create a tabular report by using Power BI Desktop to visualize data from the web service. The data returned in one column is numeric and must be converted to a corresponding text  
You need to create the report and make it available only to co workers.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.  
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

>

<

Answer area

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

**NEW QUESTION 46**

- (Topic 3)

You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

- A. Gallery
- B. Combo box
- C. Custom component
- D. Choices

**Answer:** D

**NEW QUESTION 47**

DRAG DROP - (Topic 3)

You need to select a design approach for the required features.

Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

App types	Requirement	App type
Microsoft Power Platform portal page	Record student attendance start and end times.	
Power Apps canvas app	Ensure that instructors can upload menus.	
Power Virtual Agents chatbot		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

App types	Requirement	App type
Microsoft Power Platform portal page	Record student attendance start and end times.	Microsoft Power Platform portal page
Power Apps canvas app	Ensure that instructors can upload menus.	Power Apps canvas app
Power Virtual Agents chatbot		

**NEW QUESTION 51**

- (Topic 2)

You need to create a flow for moving data from the Sales Log to the Job Setup entity. Which type of flow should you use?

- A. a scheduled flow for the Job Setup entity
- B. an instant (button) flow for the Sales Log
- C. a business process flow for the Job Setup entity
- D. an automated flow for the Sales Log

**Answer:** A

**Explanation:**

Scenario: Automatically perform the following actions immediately when a sale is won:

? Generate a sequential job number.

? Copy key sales information to the Job Setup entity used by manufacturing.

**NEW QUESTION 54**

- (Topic 2)

You need to connect to the data source for the Job Setup app. What should you do?

- A. Configure a scheduled synchronization with the Common Data Service database
- B. Configure SQL Server database permissions
- C. Create a stored procedure that retrieves time records for a specific employee
- D. Configure an on-premises data gateway

Answer: D

Explanation:

Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.  
The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference>

NEW QUESTION 55

HOTSPOT - (Topic 2)  
You need to meet the requirement for the time tracking app.  
Which controls should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	<div><div></div><div>Card</div><div>Rating</div><div>Slider</div><div>Timer</div></div>
Read the employee's number into the app.	<div><div></div><div>Barcode-scanner</div><div>Card</div><div>Image</div><div>Shape</div></div>
Display a photo of an employee when the employee badge is read.	<div><div></div><div>Camera</div><div>Card</div><div>Icon</div><div>Image</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Timer  
A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.  
Box 2: Barcode scanner  
The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.  
Box 3: Image  
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

NEW QUESTION 56

- (Topic 1)  
You need to resolve the issue for User1.  
What should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Option
Submit a status report.	<div><div></div><div>Dynamics 365 mobile app</div><div>Power Apps Studio</div><div>Power Apps mobile app</div><div>Azure mobile app</div></div>
Edit an existing status report.	<div><div></div><div>Azure SQL Database</div><div>Connector</div><div>SQL Lite DB</div><div>Collections</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Power Apps mobile app Scenario:  
 User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report. The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.  
 You can build offline capabilities in your PowerApps app so your app users can access some data or save some data even when they don't have an internet connection.

Box 2: Connector  
 Scenario: Azure SQL Database is used to store other data  
 Use the SQL Server connector to connect to SQL Server, in either Azure or an on- premises database, so that you can manage your data with create, read, update, and delete operations.

**NEW QUESTION 57**  
 HOTSPOT - (Topic 1)  
 You need to roll back the mobile app to an earlier version.

Requirement	Action
Identify the currently published version and view version notes.	<div>▼</div> <div>View the session details page for the app in Power Apps Studio.</div> <div>View environment details for the app in the Power Admin portal.</div> <div>View details for the app in the Power Apps Maker portal.</div>
Revert to an earlier version of the app.	<div>▼</div> <div>Select Restore on the previous version of the app.</div> <div>Export the previous version of the app and import as a new version.</div> <div>Delete versions of the app until the desired version is the most recent.</div>

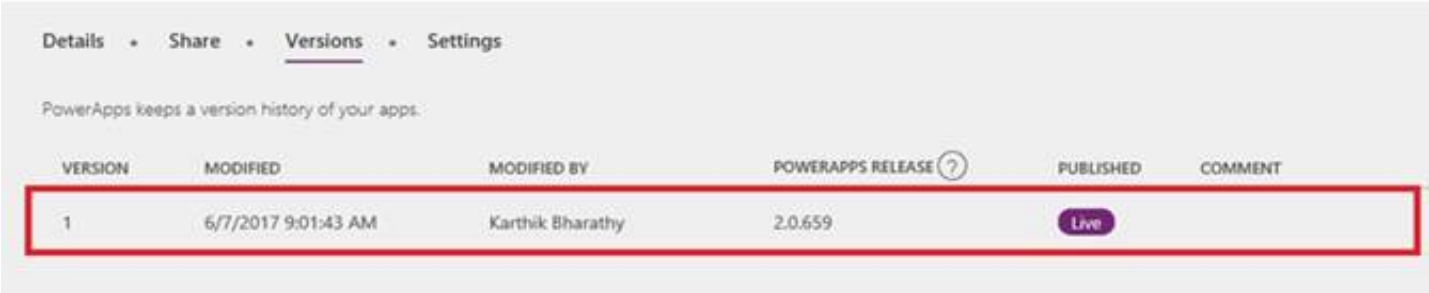

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Identify the currently published version and view version notes.	<div>▼</div> <div>View the session details page for the app in Power Apps Studio.</div> <div>View environment details for the app in the Power Admin portal.</div> <div>View details for the app in the Power Apps Maker portal.</div>
Revert to an earlier version of the app.	<div>▼</div> <div>Select Restore on the previous version of the app.</div> <div>Export the previous version of the app and import as a new version.</div> <div>Delete versions of the app until the desired version is the most recent.</div>

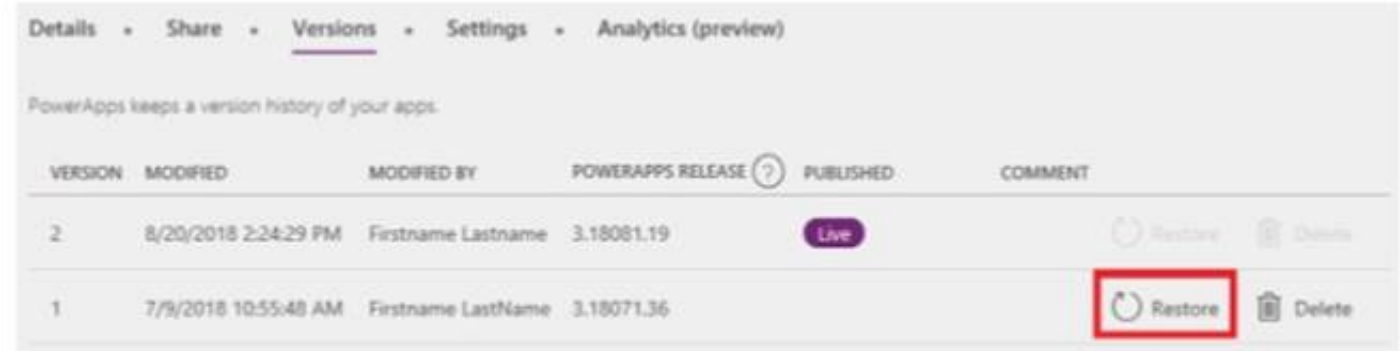

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
 Box 1: View the sessions details page for the app in Power Apps Studio  
 Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

Box 2: Select Restore on the previous version of the app. Restore an app from your account  
 ? Open powerapps.com, and then click or tap Apps in the left navigation bar.  
 ? Near the right edge, click or tap the info icon for the app that you want to restore.  
 ? Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

**NEW QUESTION 58**  
 - (Topic 1)  
 You need to meet the requirements for sales representative that submit status reports. How should you configure the flow?

- A. Add a parallel branch that uses the value of a dynamic content variable
- B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
- C. Add a condition that evaluates the risk value by using a dynamic content variable
- D. Add a data operation action that evaluates a dynamic content variable

**Answer:** C

**Explanation:**

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received.

Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

**NEW QUESTION 59**

- (Topic 1)

You need to configure functionality for submitting status reports. What should you do?

- A. Determine whether the application is offline when a user selects submit button and call the Sec () function.
- B. Determine whether the application is offline when the app load
- C. Use the SaveDaca () function in the OnSelect property.
- D. Determine whether the application is offline when a user selects the submit button and call the SaveDaca () function.
- E. Determine whether the application is offline when the app load
- F. Use the LoadDaca () function in the Submit button.

**Answer:** C

**Explanation:**

Scenario: The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.

When data is submitted offline, the data must be stored in the app until the app is back online.

Mobile users often need to be productive even when they have limited or no connectivity. LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

The SaveData function stores a collection for later use under a name.

The LoadData function reloads a collection by name that was previously saved with SaveData. You can't use this function to load a collection from another source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function->

**NEW QUESTION 62**

- (Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to tru
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to fals
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to fals
- G. Export the app as an unmanaged solution.

**Answer:** C

**Explanation:**

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

**NEW QUESTION 66**

- (Topic 1)

You need to create the mobile app. Which type of app should you create?

- A. model-driven app
- B. portal app
- C. Microsoft 365 web app
- D. canvas app

**Answer:** D

**Explanation:**

An accessible canvas app will allow users with vision, hearing, and other impairments to successfully use the app. In addition to being a requirement for many governments and organizations, following the below guidelines increases usability for all users, regardless of their abilities.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessible-apps>

**NEW QUESTION 69**

DRAG DROP - (Topic 4)

A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components

Column

Table

Row

Data source

Answer Area

Data

Excel data

Customer data

Customer identifier

Product data

Box 2: Data source Box 3: Column  
Box 4: Row

NEW QUESTION 72

DRAG DROP - (Topic 4)

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.  
The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.  
You need to create the spreadsheet.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Export the custom view to an Excel template

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Timeline  
Description automatically generated with low confidence  
Step 1: Export the custom view to an Excel dynamic pivot table  
You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.  
Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series  
Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table  
Step 4: Save the spreadsheet and upload it back to the system.

NEW QUESTION 73

DRAG DROP - (Topic 4)

You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional  
Users must be able to filter the dashboard. You need to determine how to apply the filters.  
Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Dashboard types	Requirement	Dashboard type
Standard	Filter all dashboard elements using a timeframe. Display data from multiple tables and views.	
Interactive		
Power BI embedded		

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Dashboard types	Requirement	Dashboard type

Interactive		Standard
Power BI embedded		

### NEW QUESTION 78

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision a developer environment named D1 and a sandbox environment named S1.

? Copy the production environment to both D1 and S1.

? Use D1 for development and S1 for testing.

Does the solution meet the goal?

- A. Yes  
 B. No

**Answer:** B

**Explanation:**

Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.

Note: Instead use two sandboxed environments: one for development and one for testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

### NEW QUESTION 83

HOTSPOT - (Topic 4)

You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store. The company has strict rules about access, permissions, and privacy.

Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.

You need to ensure that these rules are observed consistently and managed in one place.

Which type of app should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	App type
Access client billing details	<div> <div></div> <div>           Canvas app in Microsoft Teams            Canvas app in SharePoint            Model-driven app in SharePoint            Model-driven app in Microsoft Teams         </div> </div>
Log phone calls and schedule appointments with clients and the team assigned to them	<div> <div></div> <div>           Dynamics 365 App for Outlook            Microsoft Teams calendar            SharePoint calendar         </div> </div>

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Model-driven app in Microsoft Teams

A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.

Box 2: Sharepoint Calendar

### NEW QUESTION 88

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

#### Explanation:

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

### NEW QUESTION 91

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the production environment. Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

### NEW QUESTION 95

DRAG DROP - (Topic 4)

You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.

You need to create business rules for a custom counselling entity used by all financial advisers.

Who will be affected by the business rules?

To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Financial adviser types	Answer Area								
Office-based financial advisers only	<table><thead><tr><th>Business rule</th><th>Financial adviser type</th></tr></thead><tbody><tr><td>Set a field value with the scope set to Entity</td><td>Financial adviser type</td></tr><tr><td>Clear a field value with the scope set to All Forms</td><td>Financial adviser type</td></tr><tr><td>Set visibility of a field with the scope set to Entity</td><td>Financial adviser type</td></tr></tbody></table>	Business rule	Financial adviser type	Set a field value with the scope set to Entity	Financial adviser type	Clear a field value with the scope set to All Forms	Financial adviser type	Set visibility of a field with the scope set to Entity	Financial adviser type
Business rule	Financial adviser type								
Set a field value with the scope set to Entity	Financial adviser type								
Clear a field value with the scope set to All Forms	Financial adviser type								
Set visibility of a field with the scope set to Entity	Financial adviser type								
Remote financial advisers only									
Office-based and remote financial advisers									

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Office-based and remote financial advisers

Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.

Box 2: Office-based financial advisers only

If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form)

Box 3: Office-based financial advisers only

The following actions are not available on Canvas apps :

Show or hide columns Enable or disable columns

Create business recommendations based on business intelligence.

**NEW QUESTION 96**

- (Topic 4)  
You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

A. approval request in the Teams channel that requires a response from all approvers  
B. approval request in a chat with the three managers that requires a response from all approvers  
C. approval template that requires responses to be completed m order  
D. approval template that requires a response from all approvers

**Answer:** B

**NEW QUESTION 99**

HOTSPOT - (Topic 4)  
You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.  
The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:

- Update the Microsoft Dataverse record.
- Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.

Which components should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Component
Update the Microsoft Dataverse record.	<div>Action</div> <div>Action</div> <div>Trigger</div> <div>Function</div>
Evaluate whether the Microsoft Dataverse record should be updated.	<div>Condition</div> <div>Action</div> <div>Condition</div> <div>Data operation</div>

A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Requirement	Component
Update the Microsoft Dataverse record.	<div>Action</div>
Evaluate whether the Microsoft Dataverse record should be updated.	<div>Condition</div>

**NEW QUESTION 104**

DRAG DROP - (Topic 4)  
You are designing a canvas app.  
You need to select user interface controls to include in the app.  
Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.  
You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
<div>List box</div>	Allow users to select multiple items in a list.	<div></div>
<div>Radio</div>	Allow users to select multiple items from a list of options by typing in a phrase.	<div></div>
<div>Combo box</div>		
<div>Drop-down list</div>		

A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: List box  
A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).  
Box 2: Combo box  
A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not

affected by large data sources.  
Single or multi-select mode is configured via the SelectMultiple property.  
When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

NEW QUESTION 105

DRAG DROP - (Topic 4)

You are creating entities in a Common Data Service database to capture sales data. You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.  
You need to configure the fields for the entities.  
Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Field types

Rollup

Calculated

Simple

Answer Area

Field name	Field type
GrossAmount	<div>Field type</div>
DiscountAmount	<div>Field type</div>
TotalSales	<div>Field type</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Box 1: Calculated  
Calculated columns are calculated in real-time when they are retrieved. Calculated columns can be composed using different data types. For example, an Integer calculated column may reference values from Decimal or Currency columns.  
Box 2: Simple  
A simple column isn't defined as a calculated or rollup column.  
Box 3: Rollup  
Because rollup columns persist in the database, they can be used for filtering or sorting just like regular columns.

NEW QUESTION 109

DRAG DROP - (Topic 4)

You use Microsoft Dynamics 365 Sales.  
Business processes must use data from multiple applications. You need to implement the correct type of automation.  
Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Flow Types

cloud flow

desktop flow

business process flow

Answer Area

Application Type	Flow Type

**NEW QUESTION 112**

- (Topic 4)  
A company uses Microsoft Power Apps.  
You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.  
You need to propose the right solution.  
Solution: Add a slicer to a Power BI element on the screen where data is selected. Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 115**

HOTSPOT - (Topic 4)  
A company is using Power Automate to send an email with all active projects that are at risk.  
Projects that are stored in a table in Microsoft Dataverse are deemed at risk if the column for a risk score is greater than 70 or has a zero value.  
The flow will loop over all the records in the Dataverse Projects table and update the risk status field based on the risk score.  
You need to create a single evaluation expression to update the risk status field.  
Which expression component should you use? To answer, select the appropriate options in  
NOTE: Each correct selection is worth one point.

**Answer Area**

**Requirement**

Return a true value if a value in the risk column meets one of the two conditions.

Return a true value if a value in the risk column is 0.

Return a true value if the value in the risk column is above 70.

**NEW QUESTION 116**

- (Topic 4)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution: Create a model-driven chart on the country/region table that aggregates the total amount of the orders by country/region.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

**NEW QUESTION 120**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom column that converts the order total to USD by using the relationship between order local currency and the USD exchange rate table in Power BI Desktop and display this column in a Power BI chart by country/region.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

**NEW QUESTION 121**

- (Topic 4)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Data table

B. Vertical gallery

C. Display form

D. Drop-down

**Answer: AC**

**Explanation:**

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

**NEW QUESTION 125**

- (Topic 4)

The postal service uses a system based on the Microsoft Database to manage the delivery of packages.

To improve the delivery service, the management requires the delivery staff to use personal cell phones to communicate the location and the exact time of each delivery.

You need to design a solution. What should you do?

A. Create a button flow with user input for the delivery time and location

B. Create a UI flow that sends the delivery time and location

C. Create a button flow with full address and timestamp trigger tokens

**Answer: B**

**Explanation:**

Button trigger tokens are data points that are known and available to the device on which a button flow is running. These tokens change based on factors such as the current time or the geographic location of the device at a given moment.  
Note: For example, if you are running a button flow on a smart phone, it is likely that the phone knows the time at your current location as well as the date and your current address. In this context, the time, date and address where the phone is located are all determined at the time the button flow runs. They are automatically available for use in any button flows that are executed on the device. You can use these trigger tokens to build useful flows that will minimize repetitive tasks such as providing your location to someone or tracking how much time you spent on a particular job/service call.  
Reference:  
<https://docs.microsoft.com/en-us/power-automate/introduction-to-button-trigger-tokens>

**NEW QUESTION 130**

- (Topic 4)  
A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. SQL Server Management Studio
- D. Visual Studio Code

**Answer:** BC

**Explanation:**

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to- one) relationships:  
? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal  
? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships>

**NEW QUESTION 134**

- (Topic 4)  
A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list. You are not able to activate the flow. You need to troubleshoot the issue.  
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

**Answer:** BD

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

**NEW QUESTION 137**

DRAG DROP - (Topic 4)  
You perform repeatable tasks using software installed on a home computer. The operating system includes Microsoft Power Automate Desktop.  
You need to decide which tasks to automate using Power Automate Desktop.  
Which tasks can you automate? To answer, drag the appropriate can automate responses to the correct tasks. Each can automate response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content  
NOTE: Each correct selection is worth one point.

Options

NEW QUESTION 139

DRAG DROP - (Topic 4)

You plan to create apps for a company.

You need to identify the Power Platform tools required.

What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

Power Virtual Agents bot

Power Automate

Canvas app

Model-driven app

Answer Area

Requirement

Create an app with a customized user interface that allows users to quickly create support tickets.

Create an app that uses a guided business process to navigate through all records associated with a support ticket.

Send an email to a customer support manager every time a support ticket is created.

Create an automated chat tool that guides a customer through the support ticket creation process.

Tool

Tool

Tool

Tool

Tool

A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Canvas App

Box 2: Model-driven app

Model-driven app design is a component-focused approach to app development. Model- driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Box 3: Power Automate

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Box 4: Power Virtual Agents bot

When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 143

HOTSPOT - (Topic 4)

A company uses Microsoft Power Platform. The company categorizes customers into Specialty shop, Grocery store, Wholesaler, and Seasonal market groups by using a custom choice type column.

The staff uses a model-driven app with an interactive dashboard that displays all customer

You must update the app to provide the following functionality:

- Display selected customers by type in the interactive dashboard.
- Search for customers across multiple tables by postal code by entering any number of characters.

You need to configure the system.

Which configuration options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Display customers by type.

Search by postal code.

Configuration

Enable sync with global choice.

Enable the global filter.

Enable the searchable property.

Enable sync with global choice.

Enable the sortable property.

Enable the searchable property.

Find by setting in quick find.

Filter by setting in quick find.

Enable the searchable property.

Enable the global filter on the postal code.

A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Passing Certification Exams Made Easy

Requirement	Configuration
Display customers by type.	<div>Enable sync with global choice.</div> <div>Enable the global filter.</div> <div>Enable the searchable property.</div> <div>Enable sync with global choice.</div> <div>Enable the sortable property.</div>
Search by postal code.	<div>Enable the searchable property.</div> <div>Find by setting in quick find.</div> <div>Filter by setting in quick find.</div> <div>Enable the searchable property.</div> <div>Enable the global filter on the postal code.</div>

NEW QUESTION 145

DRAG DROP - (Topic 4)

You have a canvas app that uses multiple inputs for calculations.

You must use Test Studio to create automated tests and confirm that the app works as expected.

You need to organize your test scenarios into a hierarchy.

In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Test assertions	
Test steps	⬅️
Test suites	➡️
Test cases	⬆️

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.

Step 2: Test cases

Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.

Step 3: Test steps Step 4: Test assertions

A test case consists of test steps that contain actions. Test actions are written using Power

Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

NEW QUESTION 149

- (Topic 4)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b\_accountid

Answer: D

Explanation:

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

NEW QUESTION 152

HOTSPOT - (Topic 4)

## HOTSPOT

You are designing edit forms to display individual records selected from a list in a canvas app.

The control layout must respond to a variety of screen sizes and orientations that demonstrate the following behaviors:

- Automatically resize and arrange controls from top to bottom
- Maintain the original position of the controls.
- Require no additional property changes. You need to select the layout type.

Which layouts should you use? To answer, select the appropriate options in the answer area.

Answer Area

Behavior	Layout
Automatically resize and arrange controls from top to bottom.	<div>Vertical container</div> <div>Vertical gallery</div> <div>Horizontal gallery</div> <div>Vertical container</div> <div>Horizontal container</div>
Maintain the original position of the controls.	<div>Container</div> <div>Container</div> <div>Blank vertical gallery</div> <div>Flexible height gallery</div> <div>Section</div>

- A. Mastered  
 B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

Behavior	Layout
Automatically resize and arrange controls from top to bottom.	<div>Vertical container</div> <div>Vertical gallery</div> <div>Horizontal gallery</div> <div>Vertical container</div> <div>Horizontal container</div>
Maintain the original position of the controls.	<div>Container</div> <div>Container</div> <div>Blank vertical gallery</div> <div>Flexible height gallery</div> <div>Section</div>

## NEW QUESTION 156

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Microsoft Power BI report querying Excel file using its path. Does the solution meet the goal?

- A. Yes  
 B. No

**Answer: A**

## NEW QUESTION 159

- (Topic 4)

A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.

Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. When a file is created trigger  
 B. Get direct reports action  
 C. Wait for an approval action  
 D. When an item or a file is modified trigger  
 E. When an item is created trigger  
 F. Assign manager action  
 G. Start and wait for an approval action  
 H. Get manager action

**Answer: AFG**

## NEW QUESTION 164

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

#### NEW QUESTION 169

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners. The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

- \* Return results for the exact word that was searched.
- \* View the latest records at the top of the gallery.
- \* Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.

You need to create the gallery screen in a canvas app.

Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

**Functions**

Match
Sort
Distinct
IsMatch

**Answer Area**

**Activity**

Return results for the exact word that was searched.
View latest entry at the top
Display duplicate countries/regions only once.

**Function**

#### NEW QUESTION 174

- (Topic 4)

You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.

The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count.

You need to add logic to the app. What should you do?

- A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
- B. Create and configure a stopwatch custom control, and then add it to the gallery
- C. Create and configure a stopwatch custom component, and then add it to the aisle screen
- D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

**Answer:** C

**Explanation:**

Reference:

<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

**NEW QUESTION 176**

- (Topic 4)

You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.

You need to ensure that you can transfer the flow to another environment. What should you do?

- A. Add the flow to the default solution of the development environment and export as a managed solution.
- B. Change the environment for the flow.
- C. Add the flow to the existing solution.
- D. Add the flow to the default solution of the production environment.

**Answer:** A

**Explanation:**

It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.

Exporting our Solution

After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the ..., selecting Export.

**NEW QUESTION 181**

- (Topic 4)

A company creates multiple cases in Microsoft Dataverse each day with a status of New.

For all cases with a status of New, the system must send an email to the customer and then change the status to in Process.

You need to create a Microsoft Power Automate cloud flow to automatically send the email. What should you do?

- A. Trigger the flow on a schedule and then configure the flow to use the Compose data operation to get a list of cases and send email to each from inside a loop.
- B. Trigger the flow on a schedule and then configure the flow to use the Dataverse Listrows action to query case records using a filter and send email to each from inside a loop.
- C. Trigger the flow manually on the case and then configure the flow to send the email.

**Answer:** B

**NEW QUESTION 182**

HOTSPOT - (Topic 4)

A state planning department stores demographic data in a local SQL Server database.

The department uses a local report server to analyze the data for land development purposes.

You need to create a visual to display the demographic data.

Which component should you use? To answer, select the appropriate option in the answer area.

NEW QUESTION 192

- (Topic 4)

A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.

Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.  
B. In Advanced tools, select Monitor.  
C. Ask the coworker to add you to their team.  
D. Select the chatbot and then select the Share button.

Answer: AB

NEW QUESTION 194

- (Topic 4)

DRAG DROP

A company uses Power Apps and Microsoft Dataverse.

The company has three solutions that you must move to a target environment:

- One solution is created for security roles. You must be able to add roles to the solution in the target environment
- One solution is created for table additions and modifications. Table structures must be updated in the solution in the target environment.
- One solution is for customizations. The custom actions must not be modified in the solution in the target environment

You need to create the solutions.

Which type of solutions should you create? To answer, drag the appropriate solutions to the correct requirements- Each solution may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 197

HOTSPOT - (Topic 4)

A company uses several forms for biannual performance evaluations. The company several performance areas that have a score of 1-10. A paragraph explains the score.

The company must scan completed performance evaluations into a Common Data Service entity by using a Power Apps app. The information in the documents must automatically map to entities and convert into quantifiable information.

If any key phrases in the scored topics cause concern, the company must follow a series of actions to prepare for a follow up.

You need to extract the information and perform the actions when the evaluations are scanned.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Convert the evaluations from images to data	<div>▼</div> <div>AI Builder</div> <div>Power BI</div> <div>Dataflows</div> <div>Business rules</div>
Convert a form processing variable to an integer	<div>▼</div> <div>Initialize variable</div> <div>Add dynamic content</div> <div>Append to string variable</div> <div>Extract entities and their types from text</div>
Use the flow action to convert a form processing variable to an integer	<div>▼</div> <div>Scope</div> <div>Do until</div> <div>Condition</div> <div>Apply to each</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: AI Builder

The object detection component of AI Builder for PowerApps takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Box 2: Extract entities and their types from text

The Entity extraction prebuilt model identifies and classifies key elements from text into pre-defined entities. You can use the prebuilt model out of the box in power apps and power automate.

Box 3: Scope

Scope is a simple way to put similar actions and conditions together like a Stage.

NEW QUESTION 200

- (Topic 4)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

Answer: C

NEW QUESTION 201

DRAG DROP - (Topic 4)

A company uses Power Apps. You design the interface for a new model-driven app.

Users must interact with data from records related to the primary record form in the following ways:

- Use related business process flows.
- Display primary and related form columns.

You need to configure the forms without using additional customizations.

Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or

not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct answer is worth one point.

<b>Form types</b>		<b>Requirement</b>	<b>Form type</b>
Quick view form		Use related business process flows.	
Main form dialog	⋮	Display related columns along with other primary form columns.	
Quick create form	⋮		
Main form component control	⋮		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<b>Form types</b>		<b>Requirement</b>	<b>Form type</b>
Quick view form		Use related business process flows.	Main form component control

Quick create form	⋮		
Main form component control	⋮		

NEW QUESTION 205

DRAG DROP - (Topic 4)

You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

<b>Actions</b>	<b>Answer Area</b>
Create an entity in the new solution.	
Enter the entity Display Name and use the existing prefix.	
Add a new solution.	
Enter the entity Display Name and modify the prefix to <b>xyz</b> .	
Add a new publisher with the prefix <b>xyz</b> .	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<b>Actions</b>	<b>Answer Area</b>
Create an entity in the new solution.	Add a new publisher with the prefix <b>xyz</b> .
Enter the entity Display Name and use the existing prefix.	Add a new solution.
Add a new solution.	Create an entity in the new solution.
Enter the entity Display Name and modify the prefix to <b>xyz</b> .	Enter the entity Display Name and modify the prefix to <b>xyz</b> .
Add a new publisher with the prefix <b>xyz</b> .	

NEW QUESTION 206

DRAG DROP - (Topic 4)

An insurance broker uses a Microsoft Dataverse environment with custom tables. You create a Power Apps app to manage vehicle insurance policies.

The app has a drop-down field that allows users to categorize a policy holder's driving record. This category field is not mandatory.

You need to ensure that insurance agents enter the correct categories when creating a new vehicle policy.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

In the vehicle policy table, click on Add subcomponents and navigate to Business rules.

Add a Recommendation card, select the driver record drop-down field and enter the recommendation details.

In the vehicle policy table, navigate to Business rules.

Add a business rule and enter a meaningful business rule name.

Click on the Condition card, select the Vehicle Policy and check for new driver.

NEW QUESTION 210

DRAG DROP - (Topic 4)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field.

You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add TeamA to the field security profile.

Create a field security profile and set all the permissions for the custom attribute to **Yes**.

Add TeamB to the field security profile.

Create a field security profile and set all the permissions for the custom attribute to **No**.

Enable field-level security for the field.

Answer Area

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

? Enable field security on one or more fields for a given entity.

? Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 213

DRAG DROP - (Topic 4)

DRAG DROP

You are Designing a Power Virtual Agents chatbot in Microsoft Teams. You create an outline to describe how a conversation should be structured.

You need to configure the chatbot.

Which chatbot component should you use? To answer, drag the appropriate components to the correct conversation elements. Each component may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area	Conversation element	Component
<input type="text" value="Topic"/>		A user enters the following text in the chatbot: <b>What is the weather?</b>	<input type="text"/>
<input type="text" value="Trigger phrase"/>		The chatbot responds: <b>Where do you live?</b>	<input type="text"/>
<input type="text" value="Conversation node"/>			

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Components	Answer Area	Conversation element	Component
<input type="text" value="Topic"/>		A user enters the following text in the chatbot: <b>What is the weather?</b>	<input type="text" value="Topic"/>
<input type="text" value="Trigger phrase"/>		The chatbot responds: <b>Where do you live?</b>	<input type="text" value="Conversation node"/>
<input type="text" value="Conversation node"/>			

#### NEW QUESTION 215

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** A

**Explanation:**

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps>

#### NEW QUESTION 216

- (Topic 4)

You create a personal view.

You need to ensure that other users can access the view. What should you do?

- A. Email the users a link to the view.  
B. Set the view as the default view.  
C. Share the view with the users.  
D. Assign the view to the users.

**Answer:** C

#### NEW QUESTION 219

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

- A. Address input  
B. List box  
C. Gallery  
D. Data table

**Answer:** C

#### NEW QUESTION 221

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.  
 How should you configure the app? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Question	Response
Where do you enter the formula to change the button color?	<div> <input type="text"/> ▼                 </div> <div>                     On the RiskStatus slider.                      On the RiskLevel button.                      In the variables of the Power Apps app.                      On the OnStart property of the Power Apps app.                 </div>
Which formula should you use?	<div> <input type="text"/> ▼                 </div> <div>                     If (RiskStatus.Value &gt; 75) (return Red;                      If (RiskStatus.Value &gt; 75, Red, Green)                      If (RiskStatus.Value &gt; 75 ? Red : Green)                      RiskLevel.Fill = RiskStatus.Value &gt; 75 ? Red : Green;                 </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: On the RiskLevel button.  
 On the RiskLevel button fill property.  
 Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;  
 Most every type of control in a Power App, has a Fill property, for the fill color.

**NEW QUESTION 226**

- (Topic 4)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing. The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations. You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center
- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

**Answer:** C

**Explanation:**

- ? Find accessibility issues
- ? In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- ? App checker icon.
- ? In the menu that appears, select Accessibility.
- ? A list of issues appears, sorted first by severity and then by screen.
- ? Select the arrow next to an item to show details about it.
- ? Accessibility checker details.
- ? Select the back arrow to return to the list of items.
- ? If you decide to address an issue, select it to open the affected property.
- ? After you change one or more properties, select Re-check to update the list of issues.

Reference:

**NEW QUESTION 230**

HOTSPOT - (Topic 4)

A company is creating new app for use by technicians. Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices. Which design element should you use? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Requirement	Design element
Create an app that does not specify a screen size in the design	<div><div></div><div>Phone form factor</div><div>Tablet form factor</div><div>Blank canvas app</div><div>Model-driven app</div></div>
Lock the screen size for an app that needs to be set to a specific resolution	<div><div></div><div>Aspect ratio</div><div>Orientation</div><div>Image positioning</div><div>Display mode</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Tablet form factor Box 2: Aspect version  
Customize a canvas app by changing its screen size.  
? Sign in to Power Apps.  
? Open the app to edit.  
? Select Settings.  
? Select Display.  
? (Tablet apps only) Under Aspect ratio, perform either of these steps:  
? Select the ratio that matches the target device for this app.  
? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.

NEW QUESTION 231

HOTSPOT - (Topic 4)  
A company is building a canvas app.  
A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

Display name	Relationship name	Related table	Relationship type	Type	Customizable
Company Name	contact_customer_contacts	Contact	Many-to-one	Managed	Yes
Connected From	contact_connections1	Connection	One-to-many	Managed	Yes
Owning Team	Team_contacts	Team	Many-to-one	Standard	Yes

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

Use a grid for the Contact table and a grid for the Connection table

Use a single field for the Contact table and a grid for the Connection table

Use a grid for the Contact table and a single field for the Connection table

Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

Use a grid for the Contact table and a grid for the Team table

Use a single field for the Contact table and a grid for the Team table

Use a grid for the Contact table and a single field for the Team table

Use a single field for the Contact table and a single field for the Team table

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.  
 Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

**NEW QUESTION 234**

DRAG DROP - (Topic 4)

The company is adding a multi-stream interactive dashboard to a model-driven app.  
 The company requires configuration of the dashboard to filter the table data based on modified accounts over the last month.  
 You need to configure the filters for the model-driven app dashboard.  
 Which configuration should you use? To answer, drag the appropriate locations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
 NOTE: Each correct selection is worth one point.

Configurations

Filter by

Table view

Filter table

Time frame

Answer Area

Requirement

Configuration

Configure visual filter attributes that the dashboard can use.

Configure the field that the dashboard uses to filter the table data monthly.

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Filter table  
 Filter Table: The visual filters and global filter attributes are based on this table.  
 Box 2: Filter By  
 Filter By: The column that the time frame filter applies to.

**NEW QUESTION 239**

HOTSPOT - (Topic 4)

A company uses Power Apps and Microsoft Dataverse. You create a model-driven app that has no flows, workflows, or plug-ins.  
 The app requires a main form that has a form field named reference number. The reference number must perform the following activities:  
 • Autogenerate when new records are created.  
 • Follow the format xx/yy, where xx is an incremental number and yy indicates the last two digits of the current year.  
 You need to ensure that each record created in the Microsoft Dataverse table follows this format. Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Choose data type.	<div>Auto-number</div> <div>Whole number</div> <div>Date</div> <div>Auto-number</div> <div>Text</div>
Create format.	<div>{SEQNUM:2}/{DATETIMEUTC:yy}</div> <div>{SEQNUM:2}/{DATETIMEUTC:yy}</div> <div>{SEQNUM:2}/{DATETIMEUTC:2}</div> <div>{SEQNUM:##}/{DATETIMEUTC:yy}</div>
Set seed value.	<div>10</div> <div>#1</div> <div>100</div> <div>10</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Activity	Feature
Choose data type.	<div>Auto-number</div> <div>Whole number</div> <div>Date</div> <div>Auto-number</div> <div>Text</div>
Create format.	<div>{SEQNUM:2}/{DATETIMEUTC:yy}</div> <div>{SEQNUM:2}/{DATETIMEUTC:yy}</div> <div>{SEQNUM:2}/{DATETIMEUTC:2}</div> <div>{SEQNUM:##}/{DATETIMEUTC:yy}</div>
Set seed value.	<div>10</div> <div>#1</div> <div>100</div> <div>10</div>

NEW QUESTION 242

- (Topic 4)

A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

- A. Flow button for mobile
- B. Power Apps step with trigger conditions
- C. New Microsoft Outlook task
- D. Condition step

Answer: A

NEW QUESTION 246

DRAG DROP - (Topic 4)

DRAG DROP

You are designing several new Microsoft Power Platform apps for a company. You have the following requirements:

All apps must be able to run from the Power Apps mobile app.

You need to determine which app type to create for each department.

Which app type should you use? To answer, drag the appropriate app types to the correct departments. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

App types	Answer Area	Department	App type
Canvas		Sales	
Model driven		Direct marketing	
Portal			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

App types	Answer Area	Department	App type
Canvas		Sales	Model driven
Model driven		Direct marketing	Canvas
Portal			

#### NEW QUESTION 251

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision a trial environment named T1 and a sandbox environment named S1.

? Copy the production environment to T1 and S1.

? Use T1 for development and S1 for testing.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

#### Explanation:

Using trial environments, companies and customers can try out new features and solutions. Do not use a trial environment for development.

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/trial-environments> <https://docs.microsoft.com/en-us/power-platform/admin/sandbox-environments>

#### NEW QUESTION 253

- (Topic 4)

A company is using Microsoft Power Platform and Microsoft Teams to approve work contracts.

A manager must view all approved contracts in the past year that the company sent or received. The manager must approve any pending contracts. The solution must minimize effort.

You need to recommend a solution for the company. What should you recommend?

A. Create a Microsoft Teams team with a tab that exposes all approvals.

B. Install the Microsoft Teams approvals app.

C. Embed a Power Apps app within a Microsoft Teams channel.

D. Create a Power BI dashboard that includes all approval requests.

E. Embed a SharePoint list into a Microsoft Teams channel.

**Answer: B**

#### NEW QUESTION 256

HOTSPOT - (Topic 4)

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code.

Sales associates must be able to act on the specific data displayed in dashboards. You need to create the dashboards.

Which type of dashboards should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of dashboard
Ensure that all sales associates can view the dashboard.	<div>▼</div> <div>User</div> <div>System</div>
Ensure that sales associates can interact with data from the dashboards.	<div>▼</div> <div>Standard</div> <div>Multi-stream</div> <div>Single-stream</div>

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: User

Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.

Box 2: Single-stream

The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier 2 service leads or managers, who monitor fewer, but more complex or escalated cases.

**NEW QUESTION 261**

DRAG DROP - (Topic 4)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**App types**

Canvas app

Model-driven app

Cleaning staff	Model-driven app

**NEW QUESTION 265**

DRAG DROP - (Topic 4)

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants.

The education level at the time of enrollment is an option set in the student entity. The

? High school

? College

? Bachelor

You must split the College option into two option sets:

? College – 1 Year

? College – 2 years

The split must not impact existing data. You need to create the two option sets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Open the maker app and navigate to the student table

Publish the student entity

Save the student table

Open settings in the Power Platform admin center

Create new options for College - 1 Year and College - 2 years

**Answer Area**

Answer: A

Explanation:

NEW QUESTION 269

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps and Microsoft Dataverse.

The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:

- Share model-driven apps in multiple Microsoft Dataverse environments.
- Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.

You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the

appropriate security roles to the correct requirements. Each security role may be used once,

more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 271

- (Topic 4)

A company creates an app that uses Microsoft Dataverse tables.

The app creator wants to verify that the app is operating as expected by using a sample set of real-world data.

You need to import the sample data into Dataverse tables.

Which two technologies can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI  
B. SharePoint  
C. Power Query  
D. Dataflows

Answer: CD

Explanation:

C: You can create a table in Dataverse and fill that table with data from an OData feed by using Power Query. You can use the same techniques to integrate data from these online and on-premises sources, among others:

SQL Server Salesforce IBM DB2

Access

Excel Web APIs

OData feeds Text files

D: You can create a new Dataverse table that stores all the metadata from the dataflow run. For every refresh of a dataflow, a record is added to this table. You can also store metadata for multiple dataflow runs in the same table.

Reference:

<https://docs.microsoft.com/en-us/power-query/dataflows/load-dataflow-metadata-into-dataverse-table>

<https://docs.microsoft.com/en-us/power-query/dataflows/add-data-power-query>

#### NEW QUESTION 274

DRAG DROP - (Topic 4)

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.

You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.

You need to embed the list of boats associated with a Marina record in the entity form.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Add a Subgrid component to a form		
Select <b>Show related records</b> and then select the related entity and default view for the subgrid	➤	⬆
Save and publish the form	⬅	⬇
Select the <b>Allow users to change view</b> option		

A. Mastered

B. Not Mastered

**Answer:** A

#### Explanation:

Step 1: Add a Subgrid component to a form

You add a subgrid component the same way as you add any other component.

Step 2: Select **Show related records** and then select the related entity and default view for the subgrid

Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

? Show related rows

When selected, the subgrid displays only rows related to the current row that is displayed on the form.

Step 3: Select the **Allow users to change view** option Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

? Allow users to change view

When selected, app users can change from the Default view to another view of the table

selected in the Table property. Step 4: Save and publish the form

#### NEW QUESTION 278

- (Topic 4)

A company has 500 vendor records stored in a SQL table. Each record contains the

team wants to view the vendor records by using Power Apps. The team must be able to change the list results by applying filters. You need to display the vendor records in a canvas app. Which control should you use?

A. Text

B. Form

C. Chart

D. Gallery

**Answer:** D

#### NEW QUESTION 281

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the development environment. Export the solution as a managed solution, import the solution into production

Does the solution meet the goal?

A. Yes

B. No

**Answer:** B

#### NEW QUESTION 283

- (Topic 4)

You are creating a canvas app.

You need to store and retrieve small amounts of data on a local device when the app is offline.

Which set of functions should you use?

- A. SaveData, LoadData
- B. Set, Patch
- C. Patch, Collect
- D. Set, Collect

**Answer:** A

**Explanation:**

LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps>

**NEW QUESTION 287**

- (Topic 4)

A company uses Microsoft Power Apps.

You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.

You need to propose the right solution.

Solution: Append filter parameter to Power BI report URL. Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 291**
