

Salesforce

Exam Questions Education-Cloud-Consultant

Salesforce Certified Education Cloud Consultant Exam

NEW QUESTION 1

A university is implementing a student community and rolling it out to 20,000 students. The IT manager is concerned about the large increase in users accessing the system at any one time.

Which step should the consultant recommend?

- A. Use a third-party testing automation tool.
- B. Develop a Performance Testing Strategy.
- C. Log a case with Salesforce Support to increase limits.

Answer: B

Explanation:

The step that the consultant should recommend to the IT manager who is concerned about the large increase in users accessing the student community at any one time is B. Develop a Performance Testing Strategy¹. This is because a performance testing strategy can help the IT manager to plan, execute, and analyze tests that measure the system's performance, scalability, reliability, and availability under various user loads and scenarios. A performance testing strategy can also help the IT manager to identify and resolve any performance issues or bottlenecks before the student community goes live, and to ensure that the system meets the expected service level agreements and user satisfaction².

A. Use a third-party testing automation tool and C. Log a case with Salesforce Support to increase limits are not valid steps for this scenario. Using a third-party testing automation tool may be a part of the performance testing strategy, but it is not a step by itself. The IT manager needs to define the objectives, scope, approach, tools, and metrics of the performance testing strategy before choosing and using a testing automation tool². Logging a case with Salesforce Support to increase limits may be a possible action that the IT manager can take after conducting the performance testing and analyzing the results, but it is not a step that the consultant should recommend before the testing. The IT manager needs to determine the current and expected system capacity, throughput, response time, and resource utilization before requesting any limit increases from Salesforce Support³.

NEW QUESTION 2

A university uses the Education Data Architecture (EDA) to manage its prospective and current students. The student Contact Mailing Address fields and records are populated in Salesforce through an integration with an external system.

What should the consultant recommend?

- A. Disable address-related Trigger Handler records.
- B. Disable all EDA and custom Trigger Handler records.
- C. Set record-level trigger firing based on the Account record type.
- D. Set the Default Account Model to Administrative.

Answer: A

Explanation:

The consultant should recommend to disable address-related Trigger Handler records for the university that uses EDA to manage its prospective and current students and has the student Contact Mailing Address fields and records populated in Salesforce through an integration with an external system. Trigger Handler records are records that control the behavior of EDA triggers and can be disabled or enabled as needed. Disabling address-related Trigger Handler records can help prevent duplicate or conflicting address records from being created or updated by EDA when the student Contact Mailing Address fields and records are populated in Salesforce through an integration with an external system. Disabling all EDA and custom Trigger Handler records, setting record-level trigger firing based on the Account record type, or setting the Default Account Model to Administrative are not recommendations for the university that uses EDA to manage its prospective and current students and has the student Contact Mailing Address fields and records populated in Salesforce through an integration with an external system. References:

? <https://powerofus.force.com/s/article/EDA-TDTM>

? <https://powerofus.force.com/s/article/EDA-Addresses>

NEW QUESTION 3

A university is planning an enterprise wide implementation of the Education Data Architecture (EDA). It has asked the consultant do an analysis of standard functionality in EDA to identify additional apps it may need to purchase.

What is a standard feature of EDA?

- A. Student Advising
- B. Event Management
- C. Degree Auditing
- D. Address Management

Answer: D

Explanation:

Address Management is a standard feature of EDA that the consultant can mention as part of the analysis of standard functionality in EDA. Address Management is a feature that allows the consultant to store multiple addresses for a Contact or an Account, and specify which address is current, seasonal, or preferred.

Address Management also provides reports and dashboards that show address verification status and address changes. Student Advising, Event Management, and Degree Auditing are not standard features of EDA, but rather additional solutions or apps that may need to be purchased. References:

? <https://powerofus.force.com/s/article/EDA-Addresses>

? <https://powerofus.force.com/s/article/EDA-Data-Dictionary>

NEW QUESTION 4

The director of graduate recruitment is interested in Education Cloud. Recruitment staff need to access Opportunity and Campaign Member information about students. The IT director is concerned about cost and suggests using other license types for recruitment users.

What should the consultant discuss with the client?

- A. Unlimited Edition requires a full Salesforce license.
- B. Education Data Architecture requires a Community license.
- C. The business user case requires a Lightning Platform Plus license.
- D. The business user case requires a full Salesforce license.

Answer: D

Explanation:

The consultant should discuss with the client that the business user case requires a full Salesforce license, not other license types. A full Salesforce license allows users to access standard CRM functionality, such as Accounts, Contacts, Opportunities, and Campaigns. This is what the recruitment staff need to access Opportunity and Campaign Member information about students. Other license types, such as Lightning Platform or Community licenses, have limited access to CRM functionality and may not meet the business user case. References:

? https://help.salesforce.com/s/articleView?id=sf.users_license_types_available.htm&type=5

? https://trailhead.salesforce.com/en/content/learn/modules/identity_basics/identity_basics_licenses

NEW QUESTION 5

A university wants to track the Biology 101 class for next semester. The class will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A. and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility.

Which object in Education Data Architecture (EDA) should a consultant use to meet this requirement?

- A. Course Offering Schedule
- B. Time Block
- C. Program Enrollment

Answer: A

Explanation:

The consultant should use the Course Offering Schedule object in EDA to meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university. The Course Offering Schedule object is an object in EDA that allows users to store information about when and where a course offering is held, such as day of week, start time, end time, or location. The Course Offering Schedule object can help the consultant meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university by creating two Course Offering Schedule records for the Biology 101 course offering, one for the lecture sessions and one for the lab sessions, and specifying the day of week, start time, end time, and location for each record. Time Block, Program Enrollment, or Course Connection are not objects in EDA that the consultant should use to meet the requirement of tracking the Biology 101 class for next semester that will be held on Tuesdays and Thursdays from 3:00-4:00 PM in Lecture Hall A and on Wednesdays and Fridays from 1:00-2:30 PM in the adjacent lab facility for the university. References:

? <https://powerofus.force.com/s/article/EDA-Course-Offering-Schedules>

? <https://powerofus.force.com/s/article/EDA-Course-Offerings>

NEW QUESTION 6

A consultant is working on an Advisor Link implementation for the undergraduate Advising departments. Advisors must be able to view a student's classes, track milestones, set student meetings, and integrate meetings with their Outlook calendar. The Advising department wants to know which functionality is included with Advisor Link and whether a third-party application is necessary.

Which function may require a third-party app?

- A. Success Plans
- B. Calendar syncing
- C. Degree visualization
- D. Appointment scheduling

Answer: C

Explanation:

Degree visualization is a function that may require a third-party app for Advisor Link. Degree visualization allows advisors and students to see the progress and requirements of a degree program in a graphical way. Advisor Link does not provide this function out of the box, so a third-party app may be needed to achieve it. Success Plans, calendar syncing, and appointment scheduling are functions that are included with Advisor Link and do not require a third-party app. References:

? <https://www.salesforce.org/advisor-link/>

? https://help.salesforce.com/s/articleView?id=sf.eda_advisor_link_features.htm&type=5

NEW QUESTION 7

What is the correct order of operations to ensure customer success in an Education Cloud implementation?

- A. Document Current State, Conduct Discovery Workshops, Generate Solution Design, Write Test Scripts & Plans, Build Solution & Test, Deploy.
- B. Document Current State, Conduct: Discovery Workshops, Write Test Scripts & Plans, Build Solution & Test, Generate Solution Design, Deploy.
- C. Conduct Discovery Workshops, Document Current State, Generate Solution Design, Write Test Scripts & Plans, Build Solution & Test, Deploy,
- D. Conduct Discovery Workshops, Document Current State, Write Test Scripts Plans, Generate Solution Design, Build Solution & Test, Deploy

Answer: C

Explanation:

The correct order of operations to ensure customer success in an Education Cloud implementation is:

? Conduct Discovery Workshops: This is the first step where the consultant gathers information and requirements from the customer and stakeholders through interviews, surveys, or observations.

? Document Current State: This is the second step where the consultant analyzes and documents the current processes and systems that the customer uses and identifies gaps and opportunities for improvement.

? Generate Solution Design: This is the third step where the consultant creates and presents a solution design document that outlines how Salesforce will meet the customer's requirements and expectations, and defines the scope, timeline, and budget of the project.

? Write Test Scripts & Plans: This is the fourth step where the consultant writes test scripts and plans that describe how to test the functionality and usability of the solution in different scenarios and conditions, and defines the success criteria and exit criteria for testing.

? Build Solution & Test: This is the fifth step where the consultant builds the solution in a sandbox environment using declarative or programmatic tools, and tests the solution using the test scripts and plans to ensure quality and accuracy.

? Deploy: This is the sixth and final step where the consultant deploys the solution into the production environment using change sets or other deployment tools, and provides training and support to the customer and end users.

Documenting Current State, Conducting Discovery Workshops, Writing Test Scripts & Plans, Building Solution & Test, Generating Solution Design, or Deploying are not correct orders of operations to ensure customer success in an Education Cloud implementation. References:

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf
? <https://trailhead.salesforce.com/en/content/learn/modules/project-management-basics>

NEW QUESTION 8

A Career Services department plans to implement Salesforce. The consultant is preparing for the discovery session with the director and advising staff. Which question should the consultant ask during the discovery session?

- A. Which users need system admin access?
- B. What is the estimated project budget?
- C. What are the success metrics for the project?

Answer: C

Explanation:

The consultant should ask about the success metrics for the project to understand the goals and expectations of the Career Services department and how to measure them. This will help the consultant design a solution that aligns with the department's vision and needs. Which users need system admin access and what is the estimated project budget are questions that can be asked later in the project planning or execution phase, not during the discovery session.

References:

? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-discovery>
? <https://trailhead.salesforce.com/en/content/learn/modules/education-cloud-basics/education-cloud-project-planning>

NEW QUESTION 9

Recruiters at an institution are evaluating tools to enhance their email. They want to see when a student has opened an email or clicked on a link. Recruiters also want to insert time slots directly from their calendar into an email and allow students to choose the meeting time. Which solution should the consultant recommend?

- A. Gmail Integration
- B. Custom automation
- C. Einstein Activity Capture
- D. Salesforce Inbox

Answer: D

Explanation:

Salesforce Inbox is a solution that the consultant can recommend to enhance the email functionality for recruiters. Salesforce Inbox allows recruiters to see when a student has opened an email or clicked on a link, using email tracking features. Salesforce Inbox also allows recruiters to insert time slots directly from their calendar into an email and allow students to choose the meeting time, using meeting scheduling features. Gmail Integration, custom automation, and Einstein Activity Capture are not solutions that can provide the email functionality that recruiters want. References:

? <https://www.salesforce.com/products/sales-cloud/features/salesforce-inbox/>
? https://help.salesforce.com/s/articleView?id=sf.inbox_overview.htm&type=5

NEW QUESTION 10

The career center at a university plans to use Student Success Hub and is preparing to import student data. In which order should the data be imported?

- A. Course, Course Offering, Program Plan, and Affiliation records
- B. Account, Term, Course, and Course Offering records
- C. Account, Term, Program Enrollment, and Course records

Answer: C

Explanation:

The data should be imported in the order of Account, Term, Program Enrollment, and Course records for the career center that plans to use Student Success Hub and is preparing to import student data. The order of data import is important to ensure that the data is consistent and accurate in Salesforce and that the relationships between the objects are maintained. The data should be imported in the order of Account, Term, Program Enrollment, and Course records because these objects have dependencies or lookups to each other. For example, a Program Enrollment record has a lookup to an Account record and a Term record, and a Course record has a lookup to a Term record. Importing the data in this order can help avoid errors or missing data. Course, Course Offering, Program Plan, and Affiliation records or Account, Term, Course, and Course Offering records are not correct orders of data import for the career center that plans to use Student Success Hub and is preparing to import student data. References:

? <https://powerofus.force.com/s/article/EDA-Data-Import>
? <https://powerofus.force.com/s/article/EDA-Program-Enrollments>

NEW QUESTION 10

A large university is planning to release a new recruitment and admissions solution using Salesforce. The university is closely evaluating a launch window in conjunction with the campus calendar. Where should the university confirm the Salesforce product release dates that could impact the timeline?

- A. Trailhead
- B. Salesforce Trust website
- C. Setup Menu
- D. partner Community

Answer: B

Explanation:

The university can confirm the Salesforce product release dates that could impact the timeline on the Salesforce Trust website. The Salesforce Trust website provides information about the maintenance schedule, release calendar, and release readiness for Salesforce products. The university can use this information to plan their launch window in conjunction with the campus calendar. Trailhead, Setup Menu, and Partner Community are not places where the university can confirm the Salesforce product release dates. References:

? <https://status.salesforce.com/products/all/maintenances>

? <https://trailhead.salesforce.com/en/content/learn/modules/salesforce-release-readiness-strategies>

NEW QUESTION 11

A university's Study Abroad office is getting ready to implement Salesforce to streamline internal processes. In the past, most of the work was done using spreadsheets and paper. The office is unsure of which metrics to use to determine whether the implementation project is successful. Which metric should the consultant recommend?

- A. Number of student phone inquiries
- B. Percentage of staff logins each month
- C. Volume of emails to the office

Answer: B

Explanation:

The percentage of staff logins each month is a metric that the consultant can recommend to measure the success of the Salesforce implementation project for the Study Abroad office. This metric can indicate the level of user adoption, satisfaction, and engagement with the new system, as well as the effectiveness of the training and change management strategies. A high percentage of staff logins each month can show that the staff are using Salesforce regularly and consistently to streamline their internal processes, such as managing student applications, tracking program status, and communicating with partners.

The number of student phone inquiries and the volume of emails to the office are not valid metrics for this scenario, as they do not reflect the impact of the Salesforce implementation on the internal processes of the Study Abroad office. These metrics may be influenced by other factors, such as the demand for study abroad programs, the quality of the website and marketing materials, and the availability and responsiveness of the staff. These metrics may also not capture the efficiency and accuracy of the data and workflows that Salesforce can provide.

NEW QUESTION 14

An institution is experiencing record locking and sharing performance issues in a Salesforce org with the Education Data Architecture (EDA). A consultant notices there are more than 10,000 child records associated to a single parent record. Which object should the consultant review first?

- A. Accounts
- B. Relationships
- C. Affiliations

Answer: B

Explanation:

The consultant should review the Relationships object first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA. The Relationships object is an object in EDA that allows users to store information about how two Contacts are related to each other, such as parent-child, sibling, or spouse. The Relationships object can cause record locking and sharing performance issues in a Salesforce org with EDA if there are too many child records associated to a single parent record, such as a Contact with many Relationships or Affiliations. The consultant should review the Relationships object first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA by checking if there are any data skew or ownership skew issues and applying best practices to resolve them. Accounts or Affiliations are not objects that the consultant should review first when noticing that there are more than 10,000 child records associated to a single parent record for the institution that is experiencing record locking and sharing performance issues in a Salesforce org with EDA. References:

? <https://powerofus.force.com/s/article/EDA-Relationships>

? https://developer.salesforce.com/docs/atlas.en-us.salesforce_large_data_volumes_bp.meta/salesforce_large_data_volumes_bp/dv_deployments_introduction.htm

NEW QUESTION 19

The director of retention wants to use Advisor Link to track early alerts, help students schedule appointments with their advisers, and create program plans. Which two options are required to use Advisor Link? Choose 2 answers.

- A. Person Accounts
- B. Customer Community Plus
- C. Lightning Scheduler
- D. Education Data Architecture

Answer: BD

Explanation:

Customer Community Plus and Education Data Architecture (EDA) are two options that are required to use Advisor Link. Customer Community Plus is a license type that enables users to access Advisor Link features such as early alerts, appointments, and program plans from a portal. EDA is a data model that provides the foundation for Advisor Link and other education solutions. Person Accounts and Lightning Scheduler are not required to use Advisor Link. References:

? https://help.salesforce.com/s/articleView?id=sf.eda_advisor_link_requirements.htm&type=5

? <https://www.salesforce.org/advisor-link/>

NEW QUESTION 24

A business school will implement Salesforce for its MBA recruitment and admissions. Which role should participate in the Salesforce Center of Excellence?

- A. University technology vice president
- B. Salesforce system admin
- C. President of the university

Answer: B

Explanation:

A Salesforce system admin is a role that should participate in the Salesforce Center of Excellence (COE) for the business school that will implement Salesforce for

its MBA recruitment and admissions. A Salesforce system admin is a person who configures, maintains, and supports the Salesforce platform, ensuring that it meets the needs and requirements of the users and stakeholders. A Salesforce system admin is also responsible for managing user access, security, data quality, reports, dashboards, workflows, and integrations². A Salesforce system admin can provide valuable input and feedback to the COE, as well as execute the tasks and projects assigned by the COE.

A university technology vice president and a president of the university are not roles that should participate in the Salesforce COE for the business school. A university technology vice president is a person who oversees the overall IT strategy, budget, and operations of the university, but may not have direct involvement or expertise in the Salesforce platform³. A president of the university is a person who leads the academic, administrative, and financial affairs of the university, but may not have direct involvement or expertise in the Salesforce platform⁴. These roles may be consulted or informed by the COE, but they are not part of the COE team.

NEW QUESTION 28

The Executive Education department plans to use the Education Data Architecture (EDA) for prospective and current students. The system admin wants to map prospects and students?? employers to the standard Account field in Salesforce. Which action should the consultant recommend instead?

- A. Populate the employer Affiliation record in the Primary Business Organization field.
- B. Select Administrative as the Default Account Model in EDA Settings.
- C. Select Organization as the Default Account Model in EDA Settings.

Answer: A

Explanation:

The action that the consultant should recommend instead of mapping prospects and students?? employers to the standard Account field in Salesforce is A. Populate the employer Affiliation record in the Primary Business Organization field¹. This is because EDA uses a different account model than the standard Salesforce account model, which allows for more flexibility and scalability in capturing the complex relationships and affiliations that exist in the education sector². In EDA, an Account can represent different types of entities, such as an individual person, a household, an educational institution, an organization, or a course offering. Each Account can have a record type that defines its attributes and behavior. EDA also provides two custom objects, Relationship and Affiliation, that allow for creating connections between Accounts and Contacts. A Relationship is a connection between two Contacts, such as a parent-child or a mentor-mentee relationship. An Affiliation is a connection between a Contact and an Account, such as a student??s enrollment in a course offering, or an employee??s association with an organization².

By using the Affiliation object, the system admin can link prospects and students to their employers, which are represented by Accounts with the Organization record type. The system admin can also specify which Affiliation is the primary one for each Contact, by populating the Primary Business Organization field on the Contact record. This field is a lookup to the Affiliation object, and it allows for displaying the employer??s name and other information on the Contact page layout. By using this approach, the system admin can avoid creating duplicate or unnecessary Accounts, and can leverage the EDA data model to capture the full network of prospects and students¹.

* B. Select Administrative as the Default Account Model in EDA Settings and C. Select Organization as the Default Account Model in EDA Settings are not valid actions for this scenario. The Default Account Model in EDA Settings is a setting that determines how EDA creates Accounts for new Contacts that are created in Salesforce. The Administrative Account Model creates one Account per Contact, and assigns the same name to both records. The Household Account Model creates one Account per household, and assigns a household name to the Account. The Organization Account Model creates one Account per organization, and assigns an organization name to the Account. However, these settings do not affect how EDA maps prospects and students?? employers to the standard Account field in Salesforce, as they only apply to new Contacts and Accounts that are created in EDA³.

NEW QUESTION 31

A college is replacing its legacy system with the Education Data Architecture (EDA). The consultant is working on the data migration and needs to map available classes.

Which EDA object indicates a class is available for a given term?

- A. Course Connection
- B. Attendance Event
- C. Time Block
- D. Course Offering

Answer: D

Explanation:

Course Offering is an EDA object that indicates a class is available for a given term. Course Offering is an object that represents a specific instance of a course that is offered during a term. Course Offering can be used to track various information about a class, such as name, code, capacity, faculty, location, or schedule. The consultant can create a Course Offering record for each class that is available for a given term and associate it with the Term object. Course Connection, Attendance Event, and Time Block are not EDA objects that indicate a class is available for a given term. References:

? <https://powerofus.force.com/s/article/EDA-Course-Offerings>

? <https://powerofus.force.com/s/article/EDA-Course-Offerings>Create>

NEW QUESTION 36

A university system purchased Salesforce and wants to move to an enterprise model for all of the schools in the system. The university needs to track students both as individuals and as part of a household. The Recruitment and Admissions office also wants to track events, the event locations, and the event vendors. Which account model should the consultant recommend?

- A. Education Data Architecture (EDA) Account Model
- B. Person Account Model
- C. Standard Account Model

Answer: A

Explanation:

The consultant should recommend the Education Data Architecture (EDA) Account Model as the account model for the university system that purchased Salesforce and wants to move to an enterprise model for all of the schools in the system. The EDA Account Model is an account model that allows users to store information about individuals or organizations that are related to an educational institution, such as students, parents, faculty, staff, alumni, or donors. The EDA Account Model can help the university system track students both as individuals and as part of a household using features such as Contacts, Accounts, Relationships, or Affiliations. The EDA Account Model can also help the Recruitment and Admissions office track events, the event locations, and the event vendors using features such as Campaigns or Campaign Members. The Person Account Model and the Standard Account Model are not account models that can

meet the requirements of the university system that purchased Salesforce and wants to move to an enterprise model for all of the schools in the system.

References:

? <https://powerofus.force.com/s/article/EDA-Accounts>

? <https://powerofus.force.com/s/article/EDA-Campaigns>

NEW QUESTION 37

Where can a customer find more information on Salesforce open-source and community sprint information?

- A. Trust.salesforce.com
- B. Trailblazer Community
- C. Partner Community

Answer: B

Explanation:

The customer can find more information on Salesforce open-source and community sprint information on Trailblazer Community. Trailblazer Community is a platform that connects Salesforce customers, partners, employees, and enthusiasts to learn, share, and collaborate on Salesforce topics and projects. Trailblazer Community provides information on Salesforce open-source and community sprint events, such as dates, locations, agendas, or registration links. The customer can also join groups, forums, or blogs related to Salesforce open-source and community sprint topics on Trailblazer Community. Trust.salesforce.com, Partner Community, or AppExchange are not platforms where the customer can find more information on Salesforce open-source and community sprint information.

References:

? <https://trailhead.salesforce.com/en/content/learn/modules/trailblazer-community-basics>

? <https://trailblazercommunitygroups.com/sprints/>

NEW QUESTION 42

International Programs wants to track the emergency contacts for students who are studying abroad.

Which functionality should a consultant implement to meet this requirement?

- A. Relationships
- B. Household Accounts
- C. Affiliations
- D. Success Teams

Answer: A

Explanation:

Relationships is a functionality that the consultant can implement to meet the requirement of tracking the emergency contacts for students who are studying abroad. Relationships is a feature that allows the consultant to create and manage connections between Contacts in EDA. Relationships can be used to track various types of connections, such as family, friends, mentors, or emergency contacts. The consultant can create a custom Relationship Type for emergency contacts and associate it with the students who are studying abroad. Household Accounts, Affiliations, and Success Teams are not functionalities that can track the emergency contacts for students who are studying abroad. References:

? <https://powerofus.force.com/s/article/EDA-Relationships>

? <https://powerofus.force.com/s/article/EDA-Relationships-Create>

NEW QUESTION 44

A university plans to use a sandbox for staff training. Since sandbox environments contain personal information, the university needs a solution that will keep sensitive information anonymous.

What should the consultant recommend to ensure that student information remains private?

- A. Salesforce Data Mask
- B. Formula Fields
- C. Event Monitoring
- D. Salesforce Shield

Answer: A

Explanation:

Salesforce Data Mask is a solution that the consultant can recommend to ensure that student information remains private in a sandbox environment. Salesforce Data Mask allows the consultant to anonymize or delete sensitive data in a sandbox, such as names, emails, phone numbers, and addresses. Salesforce Data Mask also preserves the data relationships and functionality, so the sandbox can still be used for staff training. Formula Fields, Event Monitoring, and Salesforce Shield are not solutions that can keep sensitive information anonymous in a sandbox. References:

? https://help.salesforce.com/s/articleView?id=sf.data_mask.htm&type=5

? <https://www.salesforce.com/products/platform/features/data-mask/>

NEW QUESTION 46

A university is interested in using Student Success Hub and a calendar integration tool to sync student appointments with the faculty advisors' Google accounts. What should the consultant recommend?

- A. A third-party app
- B. Salesforce Scheduler
- C. Einstein Activity Capture

Answer: A

Explanation:

A third-party app is the best option for syncing student appointments with the faculty advisors' Google accounts. Student Success Hub does not have a native calendar integration tool that can sync with Google Calendar⁵. Salesforce Scheduler is a tool that allows customers to schedule appointments with service providers, but it does not integrate with Google Calendar either⁶. Einstein Activity Capture is a tool that syncs emails and events between Salesforce and Gmail or Microsoft Exchange, but it does not work with Student Success Hub appointments⁷. Therefore, a third-party app that can connect Student Success Hub and

Google Calendar is the most suitable solution. References:

? 5: Manage Calendar Sync (Support Staff) - Salesforce8

? 6: Salesforce Scheduler Implementation Guide - Salesforce9

? 7: Einstein Activity Capture Implementation Guide - Salesforce

NEW QUESTION 50

A consultant is considering disabling certain configurations to optimize the data import of a large volume of student records into a university's Salesforce environment with the Education Data.

Which configuration should the consultant retain during the data import?

- A. Workflow rules
- B. Sharing rules
- C. Role hierarchy

Answer: B

Explanation:

The consultant should retain sharing rules during the data import because they control the access and visibility of records based on criteria such as record ownership, role hierarchy, or field values. Disabling sharing rules may cause data security or privacy issues. Workflow rules and role hierarchy are configurations that can be disabled during the data import to improve performance and avoid errors or conflicts. References:

? https://help.salesforce.com/s/articleView?id=sf.data_loader_disable_triggers_workflow.htm&type=5

? https://help.salesforce.com/s/articleView?id=sf.data_loader_sharing_rules.htm&type=5

NEW QUESTION 53

The Recruitment and Admissions office wants to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices. Prospective students communicate via SMS on their mobile devices, social media, and email.

Which solution should the consultant recommend?

- A. Third-party app
- B. Salesforce Maps
- C. Einstein Bots

Answer: C

Explanation:

The best solution for the Recruitment and Admissions office to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices is C. Einstein Bots¹². Einstein Bots are chatbots that use artificial intelligence (AI) to automate conversations with prospective students on various channels, such as SMS, social media, and email. They can provide information, answer questions, collect data, and hand off the conversation to a human agent if needed. Einstein Bots can help the Recruitment and Admissions office to track digital engagement and interactions with prospects on their mobile devices, and improve the student experience¹².

A third-party app is not a Salesforce solution and may not be compatible with the Salesforce platform or the Education Data Architecture (EDA) that the Recruitment and Admissions office uses. Salesforce Maps is a location intelligence solution that helps sales and service teams optimize their territories, routes, and schedules³. It is not directly relevant to the scenario described in the question.

NEW QUESTION 54

An Admissions office is using Education Cloud to manage its student application review process. The office needs to make sure students cannot edit applications after the submission deadline.

Which two features could the consultant use to meet this requirement?

- A. OmniStudio FlexCard and validation rule
- B. OmniStudio FlexCard and sharing rule
- C. Standard Decision Matrix and custom trigger

Answer: A

Explanation:

? Using OmniStudio FlexCard:

? Applying Validation Rule:

? Steps to Implement:

? Testing: References:

? Salesforce OmniStudio Documentation: Creating FlexCards

? Salesforce Help: Validation Rules

NEW QUESTION 59

Student Services is preparing to migrate student Incident and Incident Resolution data from its old system to a Salesforce.org that uses the Education Data Architecture (EDA).

Which objects should the consultant use?

- A. Attribute
- B. Case
- C. Case Comment

Answer: B

Explanation:

The Case object is used to track student incidents and resolutions in EDA. Cases can be related to Contacts, Accounts, or Affiliations using the standard lookup fields. Cases can also have Case Comments to capture additional information or communication about the incident¹. The Attribute object is used to store additional information about Contacts or Accounts, such as demographics, interests, or preferences³. The Case Comment object is a child of the Case object and cannot be used independently. 1: Education Data Architecture (EDA) Data Model 2: Education Cloud Consultant Certification Guide & Tips - Salesforce Ben 3:

Attribute Object : Case Comment Object

NEW QUESTION 61

University Investment Services (UIS) is an internal department that manages the university endowment through financial investments. It operates independently of the university and only works with investment companies and financial institutions. UIS is interested in a CRM that will track investment companies, its company Contacts, Leads, Opportunities, and Activities.

Which solution should the consultant recommend?

- A. Sales Cloud
- B. Education Data Architecture
- C. Financial Services Cloud

Answer: C

Explanation:

Financial Services Cloud is a Salesforce solution that is designed for the financial services industry, including wealth and asset management, banking, and insurance¹. Financial Services Cloud provides features and functionality that are tailored to the needs of UIS, such as:

- ? Tracking investment companies and their contacts as financial accounts and account members².
- ? Managing leads, opportunities, and activities with standard Salesforce objects and tools³.
- ? Leveraging Einstein AI to surface insights and recommendations for investment opportunities⁴.
- ? Integrating with core financial systems and data sources using prebuilt connectors and accelerators⁵.

Sales Cloud is a general-purpose CRM solution that does not have the specific features and functionality for the financial services industry⁶. Education Data Architecture (EDA) is a Salesforce solution that is designed for the education sector, including K-12 and higher education institutions⁷. EDA does not have the specific features and functionality for the financial services industry either.

- ? 7: Education Data Architecture Overview - Salesforce

NEW QUESTION 63

A large university has a Career Service Center that provides career advice to current students and alumni. Staff provide advice the phone, via email and face-to-face. Students and alumni are served on a first come, first served basis and are rarely assigned to a specific advisor.

What should the consultant recommend to meet the requirement?

- A. Success Teams
- B. Queue Management
- C. Appointment Scheduling
- D. Assignment Rules

Answer: C

Explanation:

Appointment Scheduling is a solution that the consultant can recommend to meet the requirement of providing career advice to current students and alumni via phone,

email, or face-to-face. Appointment Scheduling is a feature that allows users to create and manage appointments with customers or clients from Salesforce.

Appointment Scheduling can be used to offer different types of services, such as career advice, tutoring, or counseling. Appointment Scheduling also integrates with calendars, email notifications, and reports. Success Teams, Queue Management, and Assignment Rules are not solutions that can meet the requirement of providing career advice to current students and alumni via phone, email, or face-to-face. References:

- ? https://help.salesforce.com/s/articleView?id=sf.appointment_scheduling_overview.htm&type=5
- ? <https://trailhead.salesforce.com/en/content/learn/modules/appointment-scheduling>

NEW QUESTION 67

A college plans to implement Student Success Hub and wants to configure Pathways to support students in their academic journey.

What should be considered when implementing Pathways?

- A. There is a limit to the number of Plan Requirement records.
- B. Pathways uses Program Plan and Plan Requirement records.
- C. There are only two levels of Program Plan requirements in Pathways.

Answer: B

Explanation:

The college should consider that Pathways uses Program Plan and Plan Requirement records when implementing Pathways to support students in their academic journey. Pathways is a feature in Student Success Hub that allows users to create and manage personalized learning plans for students based on their goals and interests. Pathways uses Program Plan and Plan Requirement records to define the structure and requirements of a learning plan, such as courses, credits, or milestones. The college should consider that Pathways uses Program Plan and Plan Requirement records when implementing Pathways to support students in their academic journey by configuring and customizing these records to match their academic programs and policies. There is a limit to the number of Plan Requirement records or there are only two levels of Program Plan requirements in Pathways are not things that the college should consider when implementing Pathways to support students in their academic journey. NEW QUESTION 72

A community college would like to use Admissions Connect and automatically admit applicants if they meet certain criteria.

What should the consultant do?

- A. Create a new flow.
- B. Activate the ApplicantCommunityHomePageController Apex class.
- C. Leverage the existing flow Sample: Application Auto Admit.

Answer: C

Explanation:

The consultant should leverage the existing flow Sample: Application Auto Admit to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect. A flow is a tool that allows users to automate business processes by guiding users through screens, collecting data, or executing actions. Sample: Application Auto Admit is an existing flow in Admissions Connect that allows users to automatically admit applicants if they meet certain criteria, such as GPA or test scores. The consultant can leverage the existing flow Sample: Application Auto Admit to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect by configuring and customizing the flow to match their admission requirements and policies. Creating a new flow, activating the ApplicantCommunityHomePageController Apex class, or developing a custom trigger that checks the submission deadline against the current date are not things that the consultant should do to automatically admit applicants if they meet certain criteria for the community college that would like to use Admissions Connect. References:

? <https://help.salesforce.com/s/articleView?id=sf.flow.htm&type=5>

? <https://www.salesforce.org/products/admissions-connect/overview/>

NEW QUESTION 75

A university Advancement office wants to track school historical data for tagged outreach and donation opportunities. Which Education Data Architecture functionality should the consultant recommend?

- A. Education History
- B. Program Plan
- C. Attribute
- D. Relationship

Answer: A

Explanation:

Education History is an EDA functionality that the consultant can recommend to track school historical data for tagged outreach and donation opportunities.

Education History is a feature that allows the consultant to store information about a Contact's previous or current education at an educational institution.

Education History can be used to track various types of information, such as school name, degree, major, minor, class year, or sports team. The consultant can use Education History to segment and target alumni based on their school historical data. Program Plan, Attribute, and Relationship are not EDA functionalities that can track school historical data for tagged outreach and donation opportunities. References:

? <https://powerofus.force.com/s/article/EDA-Education-History>

? <https://powerofus.force.com/s/article/EDA-Education-History-Create>

NEW QUESTION 80

A university completed its first implementation of Salesforce. The university wants to deliver additional functionality in smaller units through an iterative process. New functions will be enhanced and refined based on feedback. Which approach should the consultant recommend?

- A. Agile
- B. Work Breakdown Structure
- C. Waterfall

Answer: A

Explanation:

The consultant should recommend Agile as an approach to deliver additional functionality in smaller units through an iterative process for the university that completed its first implementation of Salesforce. Agile is a project management methodology that focuses on delivering value to customers in short and frequent iterations, incorporating feedback and changes along the way. Agile can help the university deliver additional functionality in smaller units through an iterative process by using features such as user stories, sprints, or scrum meetings. Work Breakdown Structure and Waterfall are not approaches that can deliver additional functionality in smaller units through an iterative process for the university that completed its first implementation of Salesforce. References:

? <https://trailhead.salesforce.com/en/content/learn/modules/agile-basics>

? https://www.salesforce.org/wp-content/uploads/2019/03/Education_Cloud_COE_Guide.pdf

NEW QUESTION 84

A university is experiencing performance degradation issues such as record locking, long search times, and long record save times. What is the likely cause for all of these issues?

- A. TDTM
- B. Insufficient code coverage
- C. Data skew
- D. Insufficient data storage

Answer: C

Explanation:

Data skew is the likely cause for all of these issues, such as record locking, long search times, and long record save times. Data skew is a condition that occurs when a large number of child records are associated with a single parent record, or when a large number of records are owned by a single user. Data skew can affect performance and functionality, such as locking records, slowing down queries, and increasing save times. TDTM, insufficient code coverage, and insufficient data storage are not likely causes for all of these issues. References:

? https://help.salesforce.com/s/articleView?id=sf.data_skew.htm&type=5

? <https://developer.salesforce.com/blogs/engineering/2012/04/avoid-account-data-skew-for-peak-performance.html>

NEW QUESTION 89

The Marketing department at a college emails former students twice a year informing them of upcoming fundraising events. The department is concern about the

number of bounced emails it receives.

Which solution should the Marketing team consider that will enable former students to update their email address?

- A. social Studio
- B. experience Cloud
- C. Salesforce Engage
- D. Salesforce Inbox

Answer: B

Explanation:

Experience Cloud is a solution that the Marketing team can consider that will enable former students to update their email address. Experience Cloud allows the college to create a branded online community where former students can log in, view and edit their profile information, and interact with other alumni. Experience Cloud also integrates with Salesforce, so any changes made by the former students in the community will be reflected in their Contact records. Social Studio, Salesforce Engage, and Salesforce Inbox are not solutions that can enable former students to update their email address. References:

? <https://www.salesforce.com/products/experience-cloud/overview/>

? https://trailhead.salesforce.com/en/content/learn/modules/community_rollout_impl/community_rollout_impl_basics

NEW QUESTION 94

College advisors want assistance proactively identifying student issues as they arise. Which functionality in Student Success Hub should the consultant recommend?

- A. Advising Events
- B. Mass Actions
- C. Early Alerts
- D. Success Plans

Answer: C

Explanation:

Early Alerts is a functionality in Student Success Hub that the consultant can recommend to meet the requirement of providing assistance to proactively identify student issues as they arise. Early Alerts is a feature that allows users to create and manage alerts for students who may need intervention or support, such as academic, financial, or personal issues. Early Alerts can help college advisors proactively identify student issues as they arise by using features such as Alert Reasons, Alert Statuses, or Alert Assignment Rules. Advising Events, Mass Actions, and Success Plans are not functionalities in Student Success Hub that can meet the requirement of providing assistance to proactively identify student issues as they arise. References:

? <https://www.salesforce.org/products/student-success-hub/overview/>

? <https://powerofus.force.com/s/article/SSHUB-Early-Alerts>

NEW QUESTION 98

A consultant is working with a university that uses Salesforce and wants to install the Education Data Architecture (EDA) in that environment.

What does the consultant need to do after installing EDA to ensure it is set up correctly?

- A. Assign EDA layouts to the Cases object.
- B. Assign EDA access to a cloned System Admin profile.
- C. Make the EDA record types available to profiles.
- D. Create and assign roles to all users who have access to EDA.

Answer: C

Explanation:

After installing EDA, the consultant needs to make the EDA record types available to profiles that need to access them. This is because EDA comes with several custom record types for standard objects, such as Account, Contact, Course, and Program Enrollment. These record types enable different views and fields for different types of records, such as Household, Student, Faculty, Course Offering, and Program Enrollment. By default, these record types are not assigned to any profiles, so the consultant needs to manually assign them to the appropriate profiles based on the business requirements and user roles of the university. This will ensure that the users can see and use the EDA record types and fields correctly and efficiently. References: Education Data Architecture Basics, Assign Record Types to Profiles

NEW QUESTION 99

Staff in Continuing and Professional Education use Salesforce and Pardot for marketing and management of its certificate programs. Staff occasionally need to view course payment information that they can access in a separate transaction system. The system admin wants Salesforce to contain only CRM data for reports and automation.

Which data management strategy should the consultant recommend for course payment information?

- A. Migrate course payments to pardot and Salesforce.
- B. Manage course payments in the transaction system and Pardot.
- C. Manage course payments in the transaction system.
- D. Integrate course payments from Salesforce to the transaction system.

Answer: C

Explanation:

The consultant should recommend to manage course payments in the transaction system as a data management strategy for course payment information. This means that the course payment information will not be stored or processed in Salesforce or Pardot, but rather in a separate system that is designed for handling transactions. This can help the system admin keep Salesforce clean and focused on CRM data for reports and automation, and avoid data duplication, integration issues, or security risks. Migrating course payments to Pardot and Salesforce, managing course payments in the transaction system and Pardot, or integrating course payments from Salesforce to the transaction system are not data management strategies that can help the system admin keep Salesforce clean and focused on CRM data for reports and automation. References:

? https://help.salesforce.com/s/articleView?id=sf.data_management.htm&type=5

? <https://trailhead.salesforce.com/en/content/learn/modules/data-management>

NEW QUESTION 101

A school is considering leveraging Student Success Hub. Which operational requirement should the consultant confirm?

- A. Einstein Bots must be enabled prior to installing Student Success Hub.
- B. Student Success Hub requires Education Data Architecture (EDA).
- C. Read, Create and Edit access to Contacts, Accounts, and Cases is required.
- D. Student Success Hub requires the K-12 Architecture Kit.

Answer: B

Explanation:

The consultant should confirm that Student Success Hub requires Education Data Architecture (EDA) as an operational requirement. Student Success Hub is a solution that extends EDA to meet the needs of student services and support. Student Success Hub provides features such as Early Alerts, Success Plans, Pathways, and Advising Events. Student Success Hub requires EDA to be installed and configured in the Salesforce environment before installing Student Success Hub. Einstein Bots being enabled prior to installing Student Success Hub, Read, Create and Edit access to Contacts, Accounts, and Cases being required, or Student Success Hub requiring the K-12 Architecture Kit are not operational requirements that the consultant should confirm. References:

? <https://www.salesforce.org/products/student-success-hub/overview/>

? <https://powerofus.force.com/s/article/SSHUB-Installation>

NEW QUESTION 103

A consultant needs to migrate international students' contact and address information to a Salesforce Education Data Architecture (EDA) environment with the State and Country Picklist feature enabled.

What should the consultant confirm before migrating the data?

- A. Contact Multi-Addresses Enabled is checked.
- B. All state and country values are ISO-3166 values.
- C. Every contact has a state and country value.

Answer: B

Explanation:

The State and Country Picklist feature in Salesforce allows users to select states and countries from predefined, standardized lists, instead of entering them manually into text fields². These picklists are based on ISO-3166 standard values, which are internationally recognized codes for identifying countries and their subdivisions. Therefore, before migrating the data, the consultant should confirm that all state and country values in the source data are ISO-3166 values, otherwise they will not match the picklist values in the target environment.

Contact Multi-Addresses Enabled is a setting in EDA that allows users to store multiple addresses for a contact, such as home, work, or mailing address. This setting does not affect the migration of state and country values, as long as they are ISO-3166 values. Every contact having a state and country value is not a requirement for the migration either, as these fields are not mandatory in EDA.

References:

? 2: Configure State and Country Picklists - Salesforce³

? : ISO 3166 - Wikipedia

? : Enable Contact Multi-Addresses - Salesforce

NEW QUESTION 106

An Admissions office wants to digitize and automate transcript requests. Currently, applicants, must follow a set of manual steps they could be more user friendly. The Admissions office wants a declaratively configured, publish facing form that created data in Salesforce.

Which solution should the consultant recommend to meet the requirement?

- A. Email-to-case
- B. Process Builder
- C. Salesforce Files
- D. App on the AppExchange

Answer: D

Explanation:

An app on the AppExchange is a solution that the consultant can recommend to meet the requirement of creating a declaratively configured, public facing form that creates data in Salesforce. An app on the AppExchange is an application that provides additional features and solutions for Salesforce. There are many apps on the AppExchange that offer form building capabilities, such as creating web forms, surveys, or quizzes, and capturing data from them in Salesforce. The consultant can help the Admissions office choose an app that meets their needs and budget. Email-to-case, Process Builder, and Salesforce Files are not solutions that can create a declaratively configured, public facing form that creates data in Salesforce. References:

? <https://appexchange.salesforce.com/appxStore?type=App&keyword=form%20builder>

? https://trailhead.salesforce.com/en/content/learn/modules/appexchange_basics

NEW QUESTION 108

The Advancement department wants to extend its Salesforce environment to support event management, including registration pages, ticketing, and agenda-building functionality.

Which solution should the consultant recommend?

- A. App on the AppExchange
- B. Elevate and Giving Pages
- C. Gift Entry Manager
- D. Event Monitoring

Answer: A

Explanation:

An app on the AppExchange is a solution that the consultant can recommend to extend the Salesforce environment to support event management functionality. The AppExchange is a marketplace where customers can find apps that provide additional features and solutions for Salesforce. There are many apps on the AppExchange that offer event management capabilities, such as registration pages, ticketing, and agenda-building. The consultant can help the Advancement

department choose an app that meets their needs and budget. Elevate and Giving Pages, Gift Entry Manager, and Event Monitoring are not solutions that can provide event management functionality. References:

? <https://appexchange.salesforce.com/appxStore?type=App&keyword=event%20management>

? <https://www.salesforce.org/blog/event-management-apps-for-nonprofits-and-higher-ed/>

NEW QUESTION 110

The Director of Advising wants to understand what students say are the most common reasons for scheduling advising appointments.

What should the consultant include in a report to meet the requirement?

- A. Case Reason
- B. Appointment Topic
- C. Alert Reason

Answer: B

Explanation:

? Understanding Student Advising Reasons:

? Reporting on Appointment Topics:

? Steps to Create the Report: References:

? Salesforce Documentation: Creating Reports and Dashboards

NEW QUESTION 113

A consultant is working with a customer who already uses Salesforce and wants to install the Education Data Architecture (EDA). The consultant has confirmed that EDA can work in the customer's existing environment.

Which location should the consultant visit to install EDA in the existing environment?

- A. Trailhead
- B. Partner Community
- C. Salesforce AppExchange

Answer: C

Explanation:

The Salesforce AppExchange is the location that the consultant should visit to install EDA in the existing environment. The Salesforce AppExchange is an online marketplace where customers can find, try, and install apps, components, and packages that extend the functionality of Salesforce. EDA is listed as a free app for education customers on the Salesforce AppExchange. The consultant can use the EDA installer page, which is a web-based tool that allows the consultant to log in to the desired org, validate the pre-install requirements, and install EDA with a few clicks. The EDA installer page can be accessed from the Salesforce AppExchange or from the direct link².

NEW QUESTION 118

A university has a Study Abroad office that is required to collect student documentation such as visa, passport, vaccinations, and other information. The university is using a spreadsheet to manage this information, and wants to track it in Salesforce.

Which EDA object should a consultant use to meet this requirement?

- A. Program Plan
- B. Success Team
- C. Attribute
- D. Affiliation

Answer: C

Explanation:

Attribute is an EDA object that the consultant should use to meet the requirement of tracking student documentation such as visa, passport, vaccinations, and other information. Attribute is an object that stores additional information about a student or an applicant that is not captured by other EDA objects. Attribute can be used to track various types of information, such as test scores, languages, hobbies, certifications, and documents. Program Plan, Success Team, and Affiliation are not EDA objects that can store student documentation. References:

? <https://powerofus.force.com/s/article/EDA-Attributes>

? <https://powerofus.force.com/s/article/EDA-Data-Dictionary>

NEW QUESTION 119

The Alumni Relations office wants to respond to posts by alumni on variety of Channels, including Instagram, Twitter, and Facebook.

Which solution should the office consider?

- A. email Studio
- B. Audience Studio
- C. Social Studio
- D. Interaction Studio

Answer: C

Explanation:

Social Studio is a solution that the Alumni Relations office can consider to respond to posts by alumni on a variety of channels, including Instagram, Twitter, and Facebook. Social Studio allows the office to monitor, publish, and engage with social media content from different platforms. Social Studio also provides analytics and insights that can help the office measure the effectiveness of their social media strategy. Email Studio, Audience Studio, and Interaction Studio are not solutions that can respond to posts by alumni on a variety of channels. References:

? <https://www.salesforce.com/products/marketing-cloud/social-media-marketing/>

? https://trailhead.salesforce.com/en/content/learn/modules/social_studio_basics

NEW QUESTION 121

A consultant needs to migrate information from a university's legacy system and reference the corresponding Education Data Architecture (EDA) objects and fields in Salesforce.

What should the consultant reference to complete this task?

- A. EDA Data Dictionary
- B. Lightning Connect
- C. Data Loader
- D. EDA Settings

Answer: A

Explanation:

The EDA Data Dictionary is a document that provides information about the EDA objects and fields, and how they relate to each other. The consultant can reference this document to map the information from the legacy system to the corresponding EDA objects and fields in Salesforce. The other options are not documents that can help the consultant complete this task. References:

? <https://powerofus.force.com/s/article/EDA-Data-Dictionary>
