

Microsoft

Exam Questions AB-731

AI Transformation Leader (beta)

NEW QUESTION 1

What is considered a best practice when forming an AI adoption team in an enterprise environment?

- A. Include representatives from legal, leadership, and business units to align AI initiatives with organizational priorities.
- B. Include primarily IT and project management staff initially to streamline deployment, adding governance and compliance roles later.
- C. Include only data scientists and engineers at first to validate technical feasibility, then add other stakeholders later.
- D. Include procurement and vendor management specialists early to evaluate AI tools, involving business teams once a platform is selected.

Answer: A

Explanation:

Enterprise AI adoption succeeds when it is cross-functional from the start. Option A is best practice because AI impacts legal risk, privacy, security, compliance, workforce processes, and business strategy—not just technology. Including leadership ensures alignment to priorities and funding; including business units ensures use cases and success metrics are real; including legal/compliance ensures responsible AI and regulatory obligations are addressed early. This prevents rework and reduces the chance of deploying solutions that are misaligned with policy or unacceptable risk.

Options B and C delay governance and business alignment, which often leads to “build first, govern later” failure modes—solutions that work technically but cannot be approved or scaled due to privacy/security gaps or unclear accountability. Option D over-optimizes for vendor selection without ensuring the organization has defined responsible AI requirements, target use cases, and operating model. Procurement is important, but it is not the primary driver of a successful adoption team. The most sustainable approach is a representative adoption team that integrates business, technical, and governance stakeholders from day one.

NEW QUESTION 2

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 3

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A generative AI solution is well-suited to predict next-quarter sales trends.	<input type="radio"/>	<input type="radio"/>
A generative AI solution can summarize lengthy policy documents.	<input type="radio"/>	<input type="radio"/>
A generative AI solution can create product descriptions from product specifications.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A generative AI solution is well-suited to predict next-quarter sales trends.	<input type="radio"/>	<input checked="" type="radio"/>
A generative AI solution can summarize lengthy policy documents.	<input checked="" type="radio"/>	<input type="radio"/>
A generative AI solution can create product descriptions from product specifications.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 4

HOTSPOT

- Select the answer that correctly completes the sentence.

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to .

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

configure and deploy AI models in the organization's Azure environment.

guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.

manage day-to-day model training and labeling tasks for AI development teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

configure and deploy AI models in the organization's Azure environment.

guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.

manage day-to-day model training and labeling tasks for AI development teams.

NEW QUESTION 5

Your company creates a custom Azure Machine Learning model that uses a generative AI assistant. The model initially delivers strong results. However, six months later, the model predictions become noticeably less accurate. What is a possible cause of the issue?

- A. The input data changed over time.
- B. The model requires additional compute resources.
- C. The model was trained incorrectly.

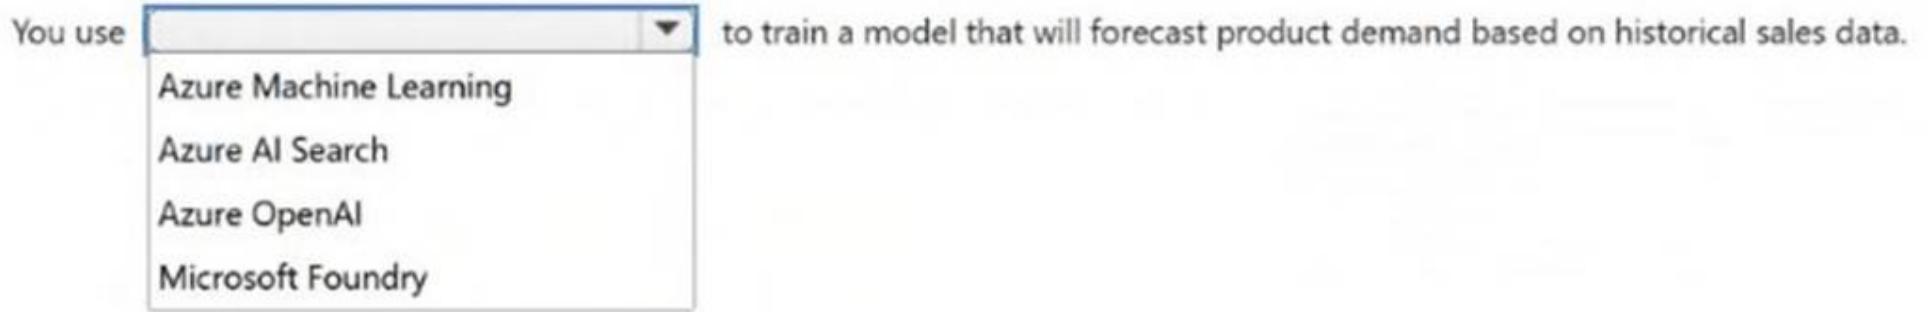

Answer: A

NEW QUESTION 6

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence.

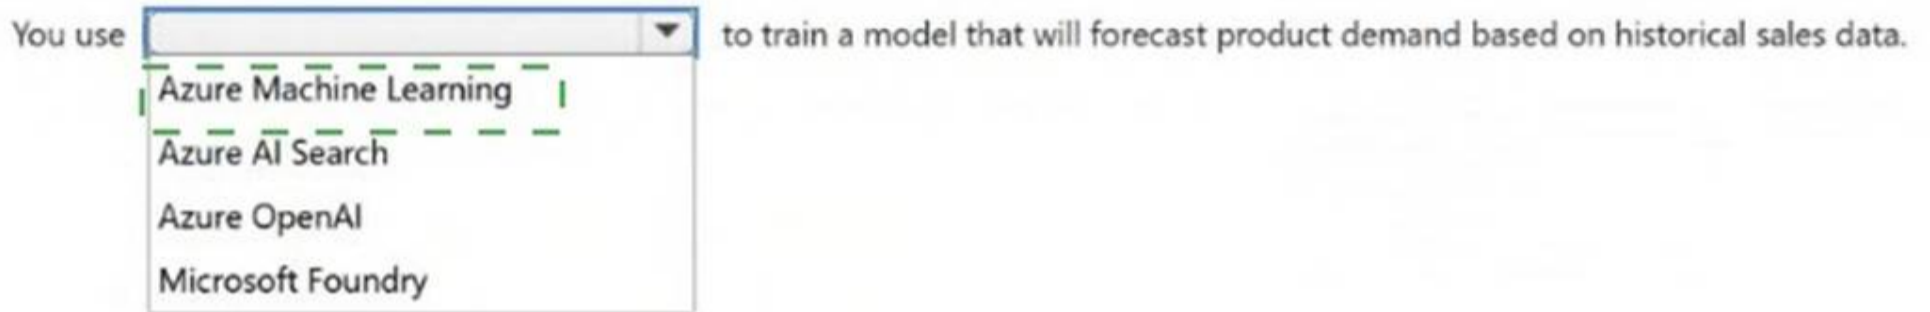

You use to train a model that will forecast product demand based on historical sales data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 7

Your company uses a generative AI solution. You need to improve the quality of responses by using grounding. Which statement accurately describes how grounding improves accuracy and relevancy?

- A. references a diverse set of people, disciplines, and perspectives
- B. explains how and why AI models generate content
- C. anchors the responses in specific data sources
- D. specifies the strengths and weaknesses of the AI model

Answer: C

NEW QUESTION 8

Your company is preparing to adopt Microsoft 365 Copilot and wants to follow Microsoft responsible AI principles. As a business leader, you propose establishing an AI governance council to ensure alignment with the responsible AI principles. What is the primary purpose of the council? More than one answer choice may achieve the goal. Select the BEST answer.

- A. to monitor user behavior and enforce compliance with internal IT policies
- B. to train employees on how to use Copilot features effectively
- C. to oversee implementation, manage technical performance, and ensure successful AI deployment
- D. to guide strategy, provide oversight, and ensure cross-functional alignment for responsible AI adoption

Answer: D

Explanation:

An AI governance council (often called an AI Council) exists primarily to set direction and provide cross-functional oversight so AI adoption stays aligned to the organization's values, risk posture, and Responsible AI commitments. That maps most directly to D. Microsoft's guidance on creating an AI Council describes leadership responsibilities such as defining and communicating the organization's AI vision, values, and policies, reviewing and approving AI use cases/projects, and coordinating with enablement and technical readiness teams to understand risks, issues, and opportunities. It also emphasizes representation across distinct functions (for example: senior leadership, legal, compliance, risk, ethics, data, technology, business, HR) to ensure governance decisions reflect a broad, accountable perspective.

The other options describe activities that may be supporting outcomes of governance, but they are not the council's primary purpose. A is narrow (IT policy enforcement/user monitoring) and is typically handled by security/compliance operations rather than the top-level governance body. B is user enablement/training (commonly owned by adoption/change management teams). C focuses on technical delivery and performance management (often owned by engineering/MLOps/service owners). The governance council's central value is strategic guidance + oversight + cross-functional alignment to ensure Responsible AI adoption is consistent, accountable, and sustainable across the business.

NEW QUESTION 9

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	<input type="radio"/>	<input type="radio"/>
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	<input type="radio"/>	<input type="radio"/>
To prevent data exposure, only the prompts used by users must be protected by using policies.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	<input checked="" type="radio"/>	<input type="radio"/>
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	<input checked="" type="radio"/>	<input type="radio"/>
To prevent data exposure, only the prompts used by users must be protected by using policies.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 10

You are exploring how Microsoft 365 Copilot uses Microsoft Graph to deliver AI-powered experiences. Which information in Microsoft Graph can Copilot use by default?

- A. emails, files, meetings, and chats in Microsoft 365
- B. data stored in a file share
- C. social media activity
- D. content from public websites

Answer: A

NEW QUESTION 10

Your company plans to implement a proof of concept PoC agent that uses Azure OpenAI. The solution must start small and provide flexibility to scale usage as demand grows. Which pricing model should you use?

- A. Microsoft 365 Copilot
- B. Batch API
- C. Provisioned PTUs
- D. Standard On-Demand

Answer: D

Explanation:

For a proof of concept, the key requirements are low commitment, quick start, and the ability to scale up or down as you learn what real usage looks like. Azure OpenAI Standard On-Demand pricing is designed for exactly that: you pay per token consumed (input and output) on a pay-as-you-go basis, which makes it ideal when demand is uncertain or variable—typical in early pilots and PoCs. By contrast, Provisioned (PTUs) is best when you have well-defined, predictable throughput and latency requirements—usually a more mature, production workload. PTUs involve reserving model processing capacity to achieve consistent performance and more predictable costs, which is usually premature for a PoC where actual traffic patterns are not yet known. Batch API is optimized for asynchronous high-volume jobs with a target turnaround (for example, up to 24 hours) and discounted pricing. That's great for offline processing, but it does not match an interactive agent PoC that typically needs near-real-time responses and iterative testing. Microsoft 365 Copilot is a separate SaaS licensing model and is not the Azure OpenAI pricing model for building your own agent solution.

NEW QUESTION 15

HOTSPOT

Select the answer that correctly completes the sentence. The Researcher agent in Microsoft 365 Copilot .

Answer Area

The Researcher agent in Microsoft 365 Copilot

creates visual dashboards from structured data in Microsoft Excel and Power BI.
 generates a pivot table and performs time series forecasting.
 performs complex, multi-step, data analysis and code execution tasks over arbitrary datasets.
 uses reasoning capabilities to generate deep insights based on organizational data and the web.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

The Researcher agent in Microsoft 365 Copilot

creates visual dashboards from structured data in Microsoft Excel and Power BI.
 generates a pivot table and performs time series forecasting.
 performs complex, multi-step, data analysis and code execution tasks over arbitrary datasets.
 uses reasoning capabilities to generate deep insights based on organizational data and the web.

NEW QUESTION 17

HOTSPOT

Select the answer that correctly completes the sentence. Prompt engineering is the process of _____.

Answer Area

Prompt engineering is the process of

integrating AI-powered tools into business workflows.
 identifying and fixing errors in AI-generated content.
 designing, developing, and training generative AI models to produce contextually relevant content.
 crafting clear instructions to guide generative AI solutions in generating context-appropriate content.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

crafting clear instructions to guide generative AI solutions in generating context-appropriate content.
 Prompt engineering is fundamentally about how you communicate intent to a generative AI model so it produces outputs that meet business expectations. The best completion is "crafting clear instructions to guide generative AI solutions in generating context-appropriate content" because it captures the practical, day-to-day discipline: shaping the input (prompt) with the right task framing, constraints, context, and output format.
 In real deployments, prompt engineering includes specifying the role and objective (for example, "act as a customer support agent"), providing the necessary context (product details, policy excerpts, audience), adding explicit requirements (tone, length, must/must-not statements), and defining structured output (JSON fields, bullet sections, headings). It can also include adding examples (few-shot prompting), clarifying what to do when information is missing, and instructing the model to cite only provided sources or to ask follow-up questions. These techniques reduce ambiguity, improve consistency, and lower the risk of hallucinations or off-brand responses.
 The other options are not accurate definitions. "Integrating AI-powered tools into business workflows" describes solution adoption/integration, not prompt engineering. "Identifying and fixing errors in AI-generated content" is review/editing or quality assurance. "Designing, developing, and training generative AI models" is model development/ML engineering. Prompt engineering operates without changing model weights; it's about steering model behavior through well-constructed instructions and context.

NEW QUESTION 20

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot Chat can only access information in open files and read emails.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot Chat can only access information in open files and read emails.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 22

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.	<input type="radio"/>	<input type="radio"/>
You can build a custom Microsoft 365 Copilot connector when the available connectors do NOT meet your data integration requirements.	<input type="radio"/>	<input type="radio"/>
To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.	<input checked="" type="radio"/>	<input type="radio"/>
You can build a custom Microsoft 365 Copilot connector when the available connectors do NOT meet your data integration requirements.	<input checked="" type="radio"/>	<input type="radio"/>
To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 23

HOTSPOT

- Select the answer that correctly completes the sentence. The primary goal of generative AI is _____ .

Answer Area

The primary goal of generative AI is

▼

to analyze trends and classify data sources.

to create new content, such as text, images, or code.

to make predictions based on historical data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

to create new content, such as text, images, or code.

Generative AI is defined by its ability to produce new outputs—content that did not previously exist in exactly that form—based on patterns learned from large datasets. That content can be text (emails, summaries, policies), images (design mockups, marketing visuals), code (snippets, scripts), audio, and more.

Therefore, the correct completion is ??to create new content, such as text, images, or code.??

The other options describe different AI categories. ??Analyze trends and classify data sources?? is primarily analytical/classification work, typically associated with traditional machine learning models (for example, clustering, categorization, fraud classification). ??Make predictions based on historical data?? is predictive AI (forecasting demand, predicting churn, estimating failure probability). While generative AI can assist those workflows by explaining results or drafting narratives, its primary purpose is not classification or forecasting—it is content synthesis.

In practical business value terms, this is why generative AI is commonly deployed for productivity tasks like drafting and rewriting content, summarizing long documents, generating customer communications, creating knowledge assistants, and producing structured outputs (tables, bullet lists, JSON) from unstructured prompts. The model's differentiator is its ability to transform instructions and context into coherent, human-like content.

NEW QUESTION 27

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	<input type="radio"/>	<input type="radio"/>
AI models rely on training data to learn patterns and identify relationships to produce outputs.	<input type="radio"/>	<input type="radio"/>
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	<input checked="" type="radio"/>	<input type="radio"/>
AI models rely on training data to learn patterns and identify relationships to produce outputs.	<input checked="" type="radio"/>	<input type="radio"/>
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 31

HOTSPOT

- Select the answer that correctly completes the sentence.

When you use Microsoft 365 Copilot connectors to connect external content to _____, your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to

▼ , your users can

- Azure AI Search
- Microsoft Graph
- Microsoft Purview
- Microsoft SharePoint

find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to

▼ , your users can

- Azure AI Search
- Microsoft Graph
- Microsoft Purview
- Microsoft SharePoint

find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

NEW QUESTION 36

HOTSPOT

You need to recommend an AI solution for each task. The solutions must use prebuilt AI capabilities to reduce development time. What should you recommend for each task?

Extract information from invoices and credit notes:

▼

- Azure AI Search
- Azure Document Intelligence in Foundry Tools
- Azure Machine Learning

▼

Identify discussion topics in customer service call recordings:

▼

- Azure AI Search
- Azure Document Intelligence in Foundry Tools
- Azure Machine Learning

▼

Detect customer sentiment and opinions:

▼

- Azure AI Search
- Azure Document Intelligence in Foundry Tools
- Azure Machine Learning

▼

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Extract information from invoices and credit notes:

Identify discussion topics in customer service call recordings:

Detect customer sentiment and opinions:

NEW QUESTION 38

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	<input type="radio"/>	<input type="radio"/>
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.

Yes

No

Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.

Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.

NEW QUESTION 39

Your company plans to use an AI-powered solution to analyze customer feedback for insights related to future product designs. You need to mitigate the privacy risks associated with the solution. What is the best approach to achieve the goal? Select the BEST answer.

- A. Anonymize the source data to remove customer Personally Identifiable Information (PII) from the feedback.
- B. Delete all the feedback data immediately after analysis.
- C. Ensure that feedback is attributable to the customer so that it can be deleted upon request.
- D. Limit privacy reviews to the final stage of the AI project lifecycle.

Answer: A

NEW QUESTION 41

Your company receives thousands of scanned invoices each month. You need to recommend an AI solution that can automatically extract key details, such as invoice numbers, vendor names, and total amounts. What is the best solution to recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Azure Document Intelligence in Foundry Tools
- B. Azure Vision in Foundry Tools
- C. Azure AI Search
- D. Azure Machine Learning

Answer: A

NEW QUESTION 43

HOTSPOT

- Select the answer that correctly completes the sentence.
 Using high-quality grounding data in a generative AI solution .

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

NEW QUESTION 45

Your company is evaluating the use of Microsoft Copilot Studio to support business process automation and employee self-service. Which two capabilities are directly supported in Copilot Studio? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Using agents to identify and respond to security incidents
- B. configuring document security

- C. drafting and summarizing files in Microsoft Word and PowerPoint
- D. building agents that connect to business data and automate user interactions
- E. customizing agent behavior and responses

Answer: DE

NEW QUESTION 47

HOTSPOT

- Select the answer that correctly completes the sentence.

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the pricing model.

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the pricing model.

Batch API
Provisioned (PTUs)
Standard (On-Demand)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the pricing model.

Batch API
Provisioned (PTUs)
Standard (On-Demand)

NEW QUESTION 49

Your company has a Microsoft 365 subscription and uses Microsoft 365 Copilot Chat. Some users need to build and use declarative agents that can access work data. Which type of license should you recommend for the users?

- A. a Microsoft 365 Copilot add-on license
- B. Microsoft Copilot Studio user license
- C. a Copilot Chat pay-as-you-go plan

Answer: A

NEW QUESTION 50

HOTSPOT

- Select the answer that correctly completes the sentence. The Analyst agent in Microsoft 365 Copilot .

Answer Area

The Analyst agent in Microsoft 365 Copilot

compiles background research for a new market or initiative.
enables you to generate audio summaries of select references.
uses a conversational agent to answer employee FAQs.
uses structured data and provides insights by using text, charts, tables, and other visuals.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

The Analyst agent in Microsoft 365 Copilot

compiles background research for a new market or initiative.

enables you to generate audio summaries of select references.

uses a conversational agent to answer employee FAQs.

uses structured data and provides insights by using text, charts, tables, and other visuals.

NEW QUESTION 55

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	<input type="radio"/>	<input type="radio"/>
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	<input type="radio"/>	<input type="radio"/>
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	<input type="radio"/>	<input checked="" type="radio"/>
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	<input checked="" type="radio"/>	<input type="radio"/>
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 56

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Retrieval Augmented Generation (RAG) requires model fine-tuning.

Yes

No

Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.

No

Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.

No

NEW QUESTION 59

Your company plans to use generative AI to help summarize and analyze internal business documents. You need to recommend a solution to prevent generative AI from accessing confidential or classified information. What should you include in the recommendation?

- A. an information barrier (IB) policy
- B. data governance
- C. a data retention policy
- D. communication monitoring

Answer: B

NEW QUESTION 64

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.

Yes

No

The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.

The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.

Yes

No

The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.

The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.
