Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

HOTSPOT

Select the answer that correctly completes the sentence.

Conditional Access policies

are configured by using the Microsoft Defender portal.
are applied only to on-premises resources.
provide control over how users can access cloud apps.
require a Microsoft Exchange mailbox.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Conditional Access policies

are configured by using the Microsoft Defender portal.
are applied only to on-premises resources.
provide control over how users can access cloud apps.
require a Microsoft Exchange mailbox.

NEW QUESTION 2

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that

use Microsoft Teams
are external to your organization
are assigned a Microsoft 365 Copilot license
are NOT assigned a Microsoft 365 Copilot license

and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that

use Microsoft Teams
are external to your organization
are assigned a Microsoft 365 Copilot license
are NOT assigned a Microsoft 365 Copilot license

and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

NEW QUESTION 3

Your company plans to use Microsoft 365 Copilot.

You need to provide a user with the ability to use Microsoft 365 Copilot, including the Researcher and Analyst agent. What should you use?

- A. the Microsoft Entra admin center
- B. the Microsoft Purview portal
- C. the Microsoft Defender portal
- D. the Microsoft 365 admin center

Answer: D

NEW QUESTION 4

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

Answer: C

Explanation:

The correct answer is C. the code interpreter capability. Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations. Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook.

Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis, statistical computations, and generating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION 5

HOTSPOT

Select the answer that correctly completes the sentence.

Microsoft Entra Privileged Identity Management (PIM) provides time-bound role activation.

Microsoft Entra Privileged Identity Management (PIM) provides

- restricted access to Microsoft 365 services.
- the lifecycle management of users.
- the management of enterprise applications.
- time-bound role activation.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Entra Privileged Identity Management (PIM) provides

- restricted access to Microsoft 365 services.
- the lifecycle management of users.
- the management of enterprise applications.
- time-bound role activation.

NEW QUESTION 6

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No

Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 7

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

Answer: D

Explanation:

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.

The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

NEW QUESTION 8

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 9

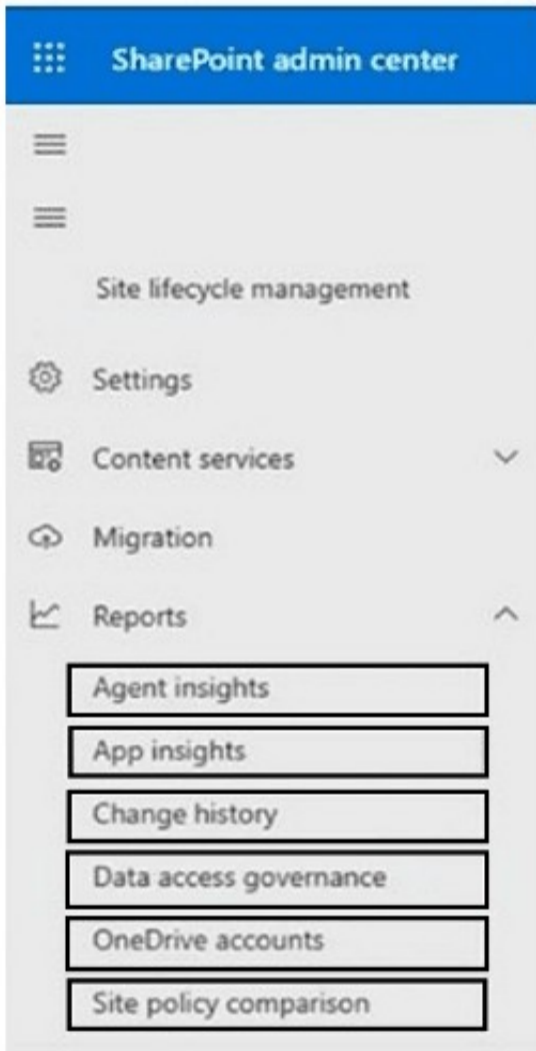

HOTSPOT

Your organization has a Microsoft 365 subscription.

You discover that Microsoft SharePoint files are being shared to users outside your organization.

You need to identify which files are being shared to the external users.

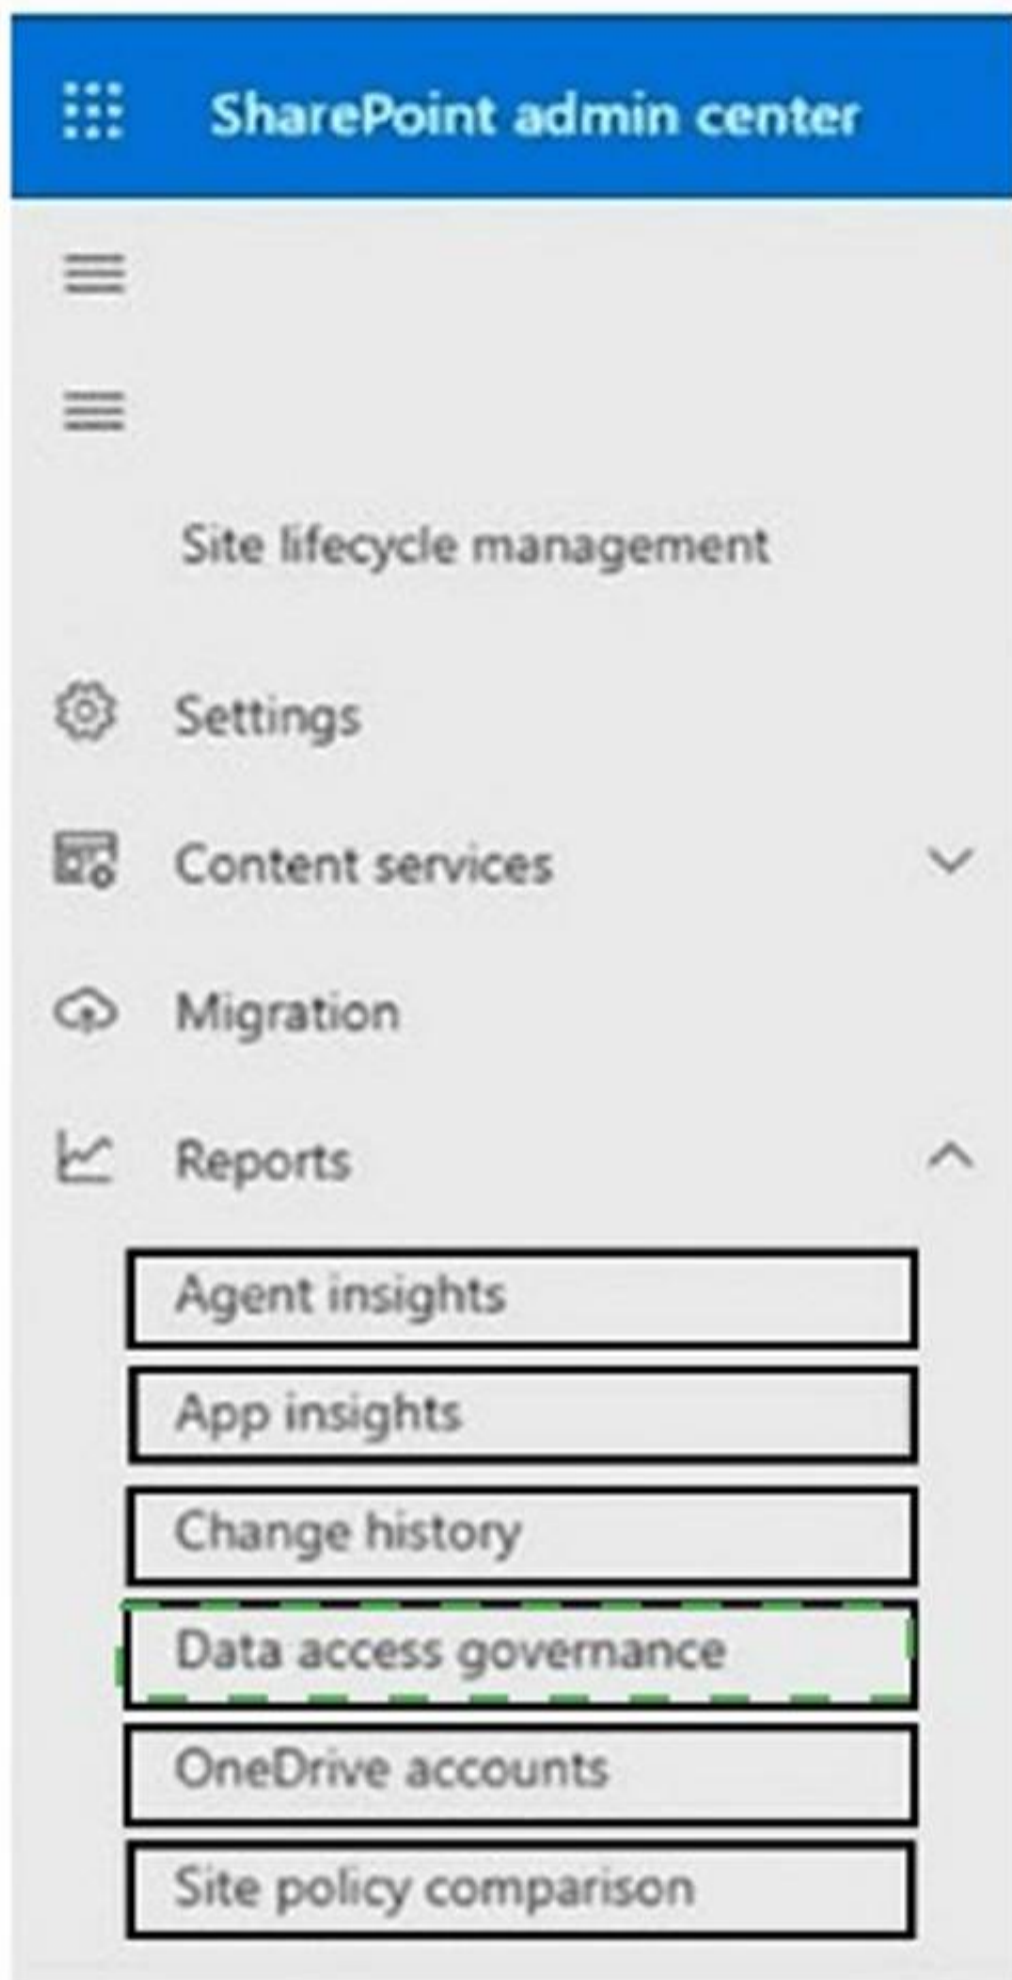

Which report should you use in the SharePoint admin center? To answer, select the appropriate report in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files.

The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 11

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a

- server.
- user.
- site.
- role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

From the SharePoint admin center, you can create a

- server.
- user.
- site.
- role.

NEW QUESTION 14

Your company has a Microsoft SharePoint site named Site1. Site1 contains all the policies of the company s HR department. The policies are saved as Microsoft Word documents.

All users have read access to Site1.

The HR department manager reports that user requests about the policies are NOT being addressed in a timely manner, especially around major holidays. You need to recommend a solution to enable the users to find the HR department policies. The solution must provide the users with a list of common queries and ensure that responses are grounded only in Site1. What should you include in the recommendation?

- A. the personal assistant in Copilot in Word
- B. a Microsoft 365 Copilot notebook
- C. a custom Microsoft 365 Copilot agent
- D. the Researcher agent in Microsoft 365 Copilot

Answer: C

NEW QUESTION 16

Your organization has a Microsoft 365 subscription. You need to evaluate your organization's Identity Secure Score. Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. the number of global administrators
- B. the SharePoint site permissions
- C. the location of the users
- D. passwords that are never expired

Answer: AD

NEW QUESTION 18

Your organization has a Microsoft 365 subscription. You need to assign a license to a user. What should you use?

- A. the Microsoft Purview portal
- B. the Microsoft 365 admin center
- C. the Microsoft Teams admin center

Answer: B

NEW QUESTION 23

HOTSPOT
 For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender for Identity monitors identities in Active Directory domains.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Microsoft Defender for Office 365 provides protection from phishing and malware attacks.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender for Identity monitors identities in Active Directory domains.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender Vulnerability Management provides protection for software as a service (SaaS) applications.	<input type="radio"/>	<input checked="" type="radio"/>
