

Exam Questions AB-731

AI Transformation Leader (beta)

<https://www.2passeasy.com/dumps/AB-731/>

NEW QUESTION 1

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence. Microsoft 365 Copilot can be used to .

Answer Area

Microsoft 365 Copilot can be used to

monitor network traffic and alerts in real time.

create a Microsoft Word document.

create a list in Microsoft SharePoint.

modify administrative permissions for Microsoft SharePoint files.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft 365 Copilot can be used to

monitor network traffic and alerts in real time.

create a Microsoft Word document.

create a list in Microsoft SharePoint.

modify administrative permissions for Microsoft SharePoint files.

NEW QUESTION 2

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	☐	☐
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	☐	☐
Microsoft Foundry can be used for image recognition and computer vision tasks.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	☒	☐
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	☒	☐
Microsoft Foundry can be used for image recognition and computer vision tasks.	☒	☐

NEW QUESTION 3

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	☐	☐
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	☐	☐
To use the Analyst agent, you need a Microsoft 365 Copilot license.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	☐	☒
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	☒	☐
To use the Analyst agent, you need a Microsoft 365 Copilot license.	☒	☐

NEW QUESTION 4

You have a historical dataset that contains 1,000 records. You need an AI solution that can analyze the data to identify patterns and predict future outcomes. What should you include in the solution?

- A. Microsoft Foundry
- B. Azure Document Intelligence in Foundry Tools
- C. Azure Machine Learning
- D. Azure Content Understanding in Foundry Tools

Answer: C

NEW QUESTION 5

Your company is preparing to adopt Microsoft 365 Copilot and wants to follow Microsoft responsible AI principles. As a business leader, you propose establishing an AI governance council to ensure alignment with the responsible AI principles. What is the primary purpose of the council? More than one answer choice may achieve the goal. Select the BEST answer.

- A. to monitor user behavior and enforce compliance with internal IT policies
- B. to train employees on how to use Copilot features effectively
- C. to oversee implementation, manage technical performance, and ensure successful AI deployment
- D. to guide strategy, provide oversight, and ensure cross-functional alignment for responsible AI adoption

Answer: D

Explanation:

An AI governance council (often called an "AI Council") exists primarily to set direction and provide cross-functional oversight so AI adoption stays aligned to the organization's values, risk posture, and Responsible AI commitments. That maps most directly to D. Microsoft's guidance on creating an AI Council describes leadership responsibilities such as defining and communicating the organization's AI vision, values, and policies, reviewing and approving AI use cases/projects, and coordinating with enablement and technical readiness teams to understand risks, issues, and opportunities. It also emphasizes representation across distinct functions (for example: senior leadership, legal, compliance, risk, ethics, data, technology, business, HR) to ensure governance decisions reflect a broad, accountable perspective.

The other options describe activities that may be supporting outcomes of governance, but they are not the council's primary purpose. A is narrow (IT policy enforcement/user monitoring) and is typically handled by security/compliance operations rather than the top-level governance body. B is user enablement/training (commonly owned by adoption/change management teams). C focuses on technical delivery and performance management (often owned by engineering/MLOps/service owners). The governance council's central value is strategic guidance + oversight + cross-functional alignment to ensure Responsible AI adoption is consistent, accountable, and sustainable across the business.

NEW QUESTION 6

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files.	☐	☐
Azure Vision in Foundry Tools can generate images based on natural language descriptions.	☐	☐
Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files. Answer: No

Azure Vision in Foundry Tools can generate images based on natural language descriptions. Answer: No

Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes. Answer: Yes

No— Azure Vision in Foundry Tools focuses oncomputer visiontasks such as image analysis and OCR (reading text from images and documents). While it can extract text from scanned PDFs via OCR,key phrase extractionis a natural language processing capability provided byAzure Language in Foundry Tools, not Azure Vision. Key phrase extraction analyzestextto identify main concepts, which is a different service family than vision.

No— Azure Vision cananalyzeexisting images (for example, generate captions/descriptions of an image), butgenerating new images from a text promptis a generative model capability (for example, DALL·E through Azure OpenAI/Azure AI Foundry model endpoints), not an Azure Vision feature. Vision describes what it ??sees??. it doesn't synthesize new images from natural language.

Yes— Azure Document Intelligence in Foundry Tools is designed forintelligent document processing, including automating extraction of structured fields from financial documents. Microsoft provides prebuilt models for invoices and supports custom extraction for similar document types, which makes it suitable for automating workflows involving invoices and credit-note style documents (field extraction, validation, routing).

NEW QUESTION 7

Your company plans to implement a proof of concept PoC agent that uses Azure OpenAI. The solution must start small and provide flexibility to scale usage as demand grows. Which pricing model should you use?

- A. Microsoft 365 Copilot
- B. Batch API
- C. Provisioned PTUs
- D. Standard On-Demand

Answer: D

Explanation:

For aproof of concept, the key requirements arelow commitment,quick start, and the ability toscale up or downas you learn what real usage looks like. Azure OpenAIStandard On-Demandpricing is designed for exactly that: you pay per token consumed (input and output) on a pay-as-you-go basis, which makes it ideal when demand is uncertain or variable—typical in early pilots and PoCs.

By contrast,Provisioned (PTUs)is best when you havewell-defined, predictable throughput and latency requirements—usually a more mature, production workload. PTUs involve reserving model processing capacity to achieve consistent performance and more predictable costs, which is usually premature for a PoC where actual traffic patterns are not yet known.

Batch APIis optimized forasynchronoushigh-volume jobs with a target turnaround (for example, up to 24 hours) and discounted pricing. That's great for offline processing, but it does not match an interactive ??agent?? PoC that typically needs near-real-time responses and iterative testing.

Microsoft 365 Copilotis a separate SaaS licensing model and is not the Azure OpenAI pricing model for building your own agent solution.

NEW QUESTION 8

HOTSPOT

- Select the answer that correctly completes the sentence. The primary goal of generative AI is ____ .

Answer Area

The primary goal of generative AI is

to analyze trends and classify data sources.

to create new content, such as text, images, or code.

to make predictions based on historical data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

to create new content, such as text, images, or code.

Generative AI is defined by its ability to produce new outputs—content that did not previously exist in exactly that form—based on patterns learned from large datasets. That content can be text (emails, summaries, policies), images (design mockups, marketing visuals), code (snippets, scripts), audio, and more. Therefore, the correct completion is ??to create new content, such as text, images, or code.??

The other options describe different AI categories. ??Analyze trends and classify data sources?? is primarily analytical/classification work, typically associated with traditional machine learning models (for example, clustering, categorization, fraud classification). ??Make predictions based on historical data?? is predictive AI (forecasting demand, predicting churn, estimating failure probability). While generative AI can assist those workflows by explaining results or drafting narratives, its primary purpose is not classification or forecasting—it is content synthesis.

In practical business value terms, this is why generative AI is commonly deployed for productivity tasks like drafting and rewriting content, summarizing long documents, generating customer communications, creating knowledge assistants, and producing structured outputs (tables, bullet lists, JSON) from unstructured prompts. The model's differentiator is its ability to transform instructions and context into coherent, human-like content.

NEW QUESTION 9

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.	☐	☐
Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.	☐	☐
Microsoft Security Copilot uses AI to assign sensitivity labels to documents.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.	☒	☐
Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.	☐	☒
Microsoft Security Copilot uses AI to assign sensitivity labels to documents.	☐	☒

NEW QUESTION 10

In which scenario is Azure Machine Learning most likely to deliver strategic value for an organization?

- A. Using historical sales data to forecast demand across product categories.
- B. Digitizing a paper-based process to reduce errors.
- C. Entering customer feedback into a spreadsheet to understand sentiment.
- D. Sending personalized emails to customers based on the customer location.

Answer: A

NEW QUESTION 10

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	☐	☐
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	☐	☐
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	☐	☐

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	☐	☒
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	☒	☐
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	☒	☐

NEW QUESTION 15

Your company discovers that several employees use personal ChatGPT accounts to assist with work tasks. You are concerned about proprietary data being shared externally. You need to evaluate the business value of rolling out Microsoft 365 Copilot. Which capability is a key benefit of using Copilot instead of a personal ChatGPT account?

- A. analyzing and producing reports based on complex data
- B. generating ideas and solving issues
- C. drafting documents, emails, presentations, and marketing materials
- D. accessing internal data in accordance with existing Microsoft 365 policies

Answer: D

NEW QUESTION 18

HOTSPOT

- Select the answer that correctly completes the sentence.

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the pricing model.

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the

Batch API

Provisioned (PTUs)

Standard (On-Demand)

 pricing model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the

Batch API

☒ Provisioned (PTUs)

Standard (On-Demand)

 pricing model.

NEW QUESTION 19

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can use Azure Language in Foundry Tools to analyze the sentiment of customer reviews.	☐	☐
You can use Azure Language in Foundry Tools to translate internal reports into multiple languages.	☐	☐
You can use Azure Language in Foundry Tools to extract text from scanned documents.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can use Azure Language in Foundry Tools to analyze the sentiment of customer reviews.	☒	☐
You can use Azure Language in Foundry Tools to translate internal reports into multiple languages.	☐	☒
You can use Azure Language in Foundry Tools to extract text from scanned documents.	☐	☒

NEW QUESTION 20

Your company has an AI solution that uses a prebuilt Azure OpenAI model to generate content. You need to reduce the cost of the solution while minimizing the impact on the quality of the generated output. Which two actions should you perform? (Select TWO.) NOTE: Each correct selection is worth one point.

- A. Fine-tune the existing model.
- B. Apply content moderation.
- C. Optimize the prompts.
- D. Switch to an alternate model.
- E. Decrease the number of hosting hours for the model.

Answer: CD
